

Briefing on Sewer Alignment Study for the Ten Mile Creek Area

Katherine E. Nelson, Planner Coordinator, Katherine.Nelson@mncppc-mc.org 301-495-4622

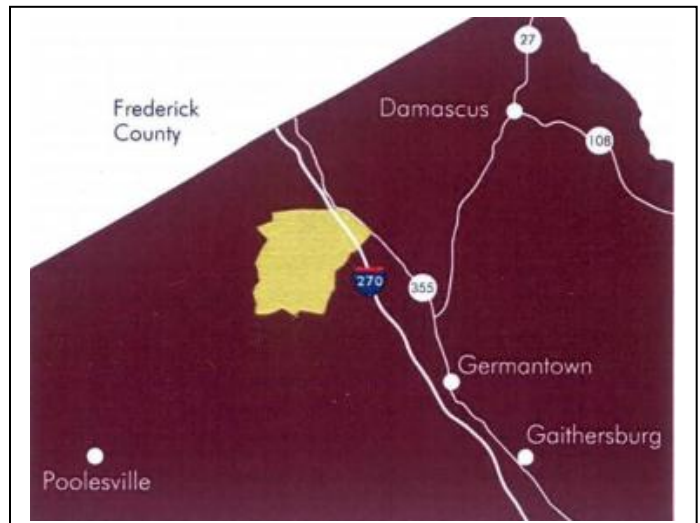

Pamela Dunn, Chief, Functional Planning, Pamela.Dunn@montgomeryplanning.org 301-650-5649

Completed: 1/08/14

Description

Briefing by the Washington Suburban Sanitary Commission on a sewer alternative study to serve the Clarksburg-Ten Mile Creek area.

Staff Recommendation: *Transmit Recommendations to Washington Suburban Sanitary Commission (WSSC)*

Summary

Washington Suburban Sanitary Commission, working with Montgomery County’s Department of Environmental Protection, is currently studying a range of sewer alternatives to serve the Clarksburg-Ten Mile Creek area. These alternatives can provide future sewer service in the Ten Mile Creek Limited Master Plan Amendment that was adopted by the Montgomery County Council earlier this year.

PRELIMINARY STAFF RECOMMENDATION

1. Planning Staff will participate in the Advisory Group being formed for this study
2. Alignment should be designed to service only those areas anticipated for development by the Ten Mile Creek Limited Master Plan Amendment.

NEXT STEPS

The Planning Board's recommendations will be transmitted to WSSC. A Customer Advisory Committee will be formed from members of the community to provide feedback on the sewer planning study. Recommendations are scheduled to go to the County Council in March of 2015.
