Summary

Staff will present the Public Hearing Draft recommendations and testimony for the Executive Boulevard District in the White Flint 2 Sector Plan area. The Draft Plan divides the District into two areas: Executive Boulevard North and Executive Boulevard South. As a traditional suburban office park, Executive Boulevard is a unique section of the Plan area with 2.1 million square feet of development. The Department’s Research and Special Projects Division prepared a financial analysis to determine if the Draft Plan’s recommended densities would provide an incentive for a property owner to redevelop in the future. (See Attachment 2.)
SCHEDULE

The Planning Board held a public hearing on the Draft White Flint 2 Sector Plan on January 12, 2017. The public hearing record was open until the close of business on January 12, 2017. The public hearing testimony is summarized in Attachment 1. The Planning Board held the first worksession on the Public Hearing Draft on January 27. Staff presented the initial transportation analysis and staging recommendations in the Public Hearing Draft. The following is the proposed schedule for future worksessions.

- February 23  Worksession No. 3: Montrose North-Rockville Pike
- March 9  Worksession No. 4: Parklawn South and Randolph Hills
- March 23  Worksession No. 5: Public Facilities

PURPOSE OF THIS WORKSESSION

The purpose of this worksession is to present an overview of the public hearing testimony regarding land use and density recommendations for the Executive Boulevard District as well as to discuss the financial analysis for future redevelopment.

Testimony

The property owners’ testimony from Executive Boulevard is varied. Some property owners desire significantly more densities, building heights and a different range of uses (residential and non-residential). While other property owners wanted minor changes and others were supportive of the Draft Plan’s recommendations. Some property owners supported the Employment Office (EOF) zone, while others suggested the Commercial Residential Town (CRT) or Commercial Residential (CR) zones.

Financial Analysis

The Research & Special Projects Division evaluated the economic feasibility of redevelopment concepts proposed by Willco and Eagle Bank, two property owners on Executive Boulevard. The purpose of the analysis is to understand the economic implications of the density and building height recommendations they are contemplating for these two properties, and to estimate how the scale of these developments would impact the surrounding market.

Draft Plan Recommendations

The Executive Boulevard district is west of Pike & Rose and the Metro West District in the 2010 White Flint Sector Plan area. Portions of this district have the potential to evolve from the current single office use into a sustainable and innovative district with mixed-uses. This district will benefit from its proximity to new development and infrastructure, including Pike & Rose and the White Flint Metrorail Station.
This district is divided into two segments - Executive Boulevard North and Executive Boulevard South.

This district, which is approximately 91 acres, is in the Employment Office (EOF 0.75 H-100) zone. The 1992 North Bethesda/Garrett Park Master Plan made no specific recommendations for this district.

It is envisioned that existing environmental and health resources will provide the framework for new infill development and some redevelopment to create a sustainable and innovative district. Several existing offices will be retained and complemented by new residential and non-residential development, especially properties that are in proximity to new infrastructure and development in the 2010 White Flint Sector Plan area. The realignment of Executive Boulevard and Old Georgetown Road (MD 187) and the opening of Towne Road will provide greater pedestrian and vehicular access to and from this district.

Some of the important recommendations in this District are:

- Mixed-use development on key properties
- Transition development to the existing Luxmanor residential community
- Linkages to the Western Workaround
- An urban school
- Protected bikeway on Executive Boulevard
- Protection of existing forested area
Key properties in Executive Boulevard-South

Executive Boulevard South: Existing Zoning

Executive Boulevard South: Draft Plan Recommended Zoning

<tbody>
<tr>
<td><strong>Wendy Calhoun-Walter Johnson (WJ) Cluster</strong></td>
<td>Agreed with the Plan recommendation for an elementary school at Wilgus/Willco; opposed to Rocking Horse Road Center as a school site; the staging recommendation for the elementary school should be sooner than the third stage; reserve school sites prior to new development; and a third middle school is needed for the WJ Cluster.</td>
<td>The Plan acknowledges the importance of public schools and identifies appropriate locations. MCPS will participate at a future worksession.</td>
</tr>
<tr>
<td><strong>Casey Cirner-1215 East Jefferson Street</strong></td>
<td>NIH leased portion of the property has expired; Requests Commercial Residential (CR)-1.5 or Employment Office (EOF) 1.5, if modifications are made to permit greater flexibility with uses, such as senior housing and more than 30 percent of residential development.</td>
<td>The Planning Board will receive alternatives to consider during the worksessions.</td>
</tr>
<tr>
<td><strong>Jennifer Russel-1215 East Jefferson Street</strong></td>
<td>No opportunities for optional method with the Draft Plan recommendation of 1.0 FAR in the EOF zone; EOF 1.5 FAR; use of the CR zone or modifications to the EOF zone.</td>
<td>See above regarding future worksessions.</td>
</tr>
<tr>
<td><strong>Cindy Bar-Nicholson Court</strong></td>
<td>Industrial properties along the CSX tracks have been evolving, including truck access and space needs; restriction of IL Zone; Barwood Taxi recently filed for bankruptcy; CR 2.0 floating zone requested.</td>
<td>The Draft Plan recommendation is to retain light industrial since the uses serve a broader county-wide function and contribute to diverse local economy.</td>
</tr>
</tbody>
</table>
| **Amy Ginsburg-Friends of White Flint** | **Schools** Supportive of dedicated sites for an elementary school.  
**Connections** No solution to creating a pedestrian-bike path over the CSX tracks between White Flint 1 and 2-connection should be incorporated into the future MARC station. Sidewalk along the east side of MD 355 along the bridge over Montrose Parkway. | The assessment for a MARC station is recommended since MTA’s prior recommendation to close the Garrett Park Station, if a new station is located in the White Flint area. The 2010 White Flint Plan explored extending Old Georgetown Road across the CSX but significant impacts and costs. |

<tr>
<td></td>
<td>Enhance pedestrian access, install a crosswalk on the east side of Towne Road</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Lighted pedestrian path behind offices on Executive Blvd.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Support for reconfiguration of Parklawn Drive and Randolph Road; Boiling Brook Parkway and Rocking Horse Road.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Signalized intersection at the future Rose Avenue and Towne Road.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Provide more clearly define larger illustrations that show bikeways and pedestrian paths with White Flint 1 (2010) Office, Business, Industrial and Residential Space</td>
<td></td>
</tr>
<tr>
<td>Office, Business, Industrial and Residential Space</td>
<td>More innovative office and residential concepts, such as micro-units, shared housing and condos and apartments for either residential and office buildings.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Include language to encourage new small businesses, such as an incubator, and language to encourage the retention of locally owned small businesses.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Encourage traditional and innovative senior housing options.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Supportive of keeping light industrial space but supports mixed-use and higher density around Randolph Hills Shopping Center and Nicholson Court.</td>
<td></td>
</tr>
<tr>
<td>Affordable Housing</td>
<td></td>
<td>Alternative pedestrian/bike crossing will be explored during the worksessions.</td>
</tr>
<tr>
<td></td>
<td>Specific operational issues will not be within the Plan; it could be within the appendix. SHA has approved a signalized intersection at Rose Avenue and Towne Road.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Revised Plan recommendations will include senior housing and other innovative housing concepts. And, affordable housing will be discussed during the worksessions.</td>
<td></td>
</tr>
<tr>

<tbody>
<tr>
<td>Robby Brewer and Miguel Iraola,</td>
<td>A zoning text amendment should be considered, similar to the Twinbrook Overlay Zone. A floating zone designation (CRT), if the base industrial zone is retained.</td>
<td>All existing multifamily residential zone properties will be discussed with the Board during the worksessions.</td>
</tr>
<tr>
<td>Oxford Square</td>
<td></td>
<td>The proposed height is appropriate for the property.</td>
</tr>
<tr>
<td></td>
<td>Request to rezone the Oxford Square garden apartments (R-30 zone) property to the CR or CRT zone (1.0 FAR) to facilitate redevelopment. The maximum height would be 65 feet.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Retaining the R-30 would preclude redevelopment. Existing buildings, built in the 1960s, are reaching the end of their useful lives. Buildings lack ADA accessibility, modern fire code protection and stormwater management on the property.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>For a future redevelopment, the owner proposes 15% MPDUs with a strong component of larger two and three bedroom units.</td>
<td></td>
</tr>
<tr>
<td>Ric Erdheim, Cherington</td>
<td>Support for the dedication of the entire area that is immediately south of the Cherington townhouses as a park.</td>
<td>Supportive of the Draft Plan recommendation.</td>
</tr>
<tr>
<td>Homeowners Association</td>
<td>The preservation of the area adjacent to the existing Cherington is consistent with several County goals-open space, linkages to the Montrose bikeway and creating an attractive public space.</td>
<td>Stonehenge Place bisects a parcel that leaves a small portion into a mixed-use zone. The larger area that is adjacent to the Cherington is primarily residential.</td>
</tr>
<tr>
<td></td>
<td>Health benefits of nature.</td>
<td>Initial transportation forecast indicated that congestion will not be an issue along East Jefferson. A new bikeway will provide important linkage to the City of Rockville and the 2010 Plan area.</td>
</tr>
<tr>
<td></td>
<td>Opposed to commercial development west of Stonehenge Place.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Supportive of mixed use east of Stonehenge Place but building heights must be lower as they move towards the Cherington.</td>
<td></td>
</tr>
<tr>

<td>Comments</td>
<td>Staff Response</td>
</tr>
<tr>
<td>------------------------</td>
<td>----------</td>
<td>----------------</td>
</tr>
<tr>
<td></td>
<td>New north-south street may increase cut-through traffic in the neighborhood. A light at Montrose Parkway and Stonehenge Place. Removal of travel lanes on East Jefferson will increase congestion and make travel more difficult.</td>
<td>The Draft Plan’s recommendation permit the highest FAR for the Willco property since it will benefit from the Western Workaround, Pike &amp; Rose, and the future second Metro entrance. A future worksession will review this property.</td>
</tr>
<tr>
<td>Barbara Sears, Willco and Wilgus properties</td>
<td>The Washington Science Center property (Willco), which is approximately 20.1 acres should have a higher zone (CR 3.0 C1.5 R2.5 H-200) since it is walking distance to Metro and is adjacent to Pike &amp; Rose. The proposed zone should be CR-3 for the Wilgus property, which is approximately 6.35 acres. The middle segment of the property, which is approximately 3.77 acres, should be CRT 2.5 C1.5 R2.0 H150. The last component of the Wilgus property, which is immediately adjacent to the Cherington Townhouses should be CRT 1.25 with no commercial allowed and 50 feet in height. This is a poor choice for a park. A central park located further east would be more accessible to surrounding development. No school site is necessary. Willco has offered to work with MCPS on a small site paradigm but MCPS has not pursued that model.</td>
<td></td>
</tr>
<tr>
<td>Scott Wallace, Morgan Apartments</td>
<td>The existing 132 unit Morgan Apartments, built in 1996, under the existing R-20 Zone. There is no incentive for redevelopment since no additional dwelling units can be constructed on the property. Proposal is to change the zone to CR 1.25 C0.25 R1.25 H-120.</td>
<td>See above regarding multifamily residential development.</td>
</tr>
<tr>
<td>Justin Jacocks, Walnut Grove Condominium</td>
<td>Need for updated zoning to add incremental residential development to preserve and improve existing community.</td>
<td>See above regarding multifamily residential development.</td>
</tr>
<tr>
<td>Person/Agency/Property</td>
<td>Comments</td>
<td>Staff Response</td>
</tr>
<tr>
<td>--------------------------------------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Retaining the existing zone would make it difficult to address challenges at Walnut Grove-aging buildings and site infrastructure.</td>
<td>Extension of Macon for additional vehicular access.</td>
<td>Property grades will change during future development; therefore, it is inappropriate to use it as a measure to establish a building’s height. 200 feet is inappropriate to an established residential neighborhood. The adjacent 2010 White Flint Plan lowered building heights to 100 feet and 70 feet, respectively, east of Old Georgetown Road.</td>
</tr>
<tr>
<td>Person/Agency/Property</td>
<td>Comments</td>
<td>Staff Response</td>
</tr>
<tr>
<td>------------------------</td>
<td>----------</td>
<td>----------------</td>
</tr>
<tr>
<td>Karen Kirchberg, Cherington resident</td>
<td>Informed that the new road-Montrose Parkway-would require a 100 foot tree barrier and preservation of some green space. Keep the forest in place for all (drivers, bikers and walkers) to enjoy. A linear park will produce oxygen, absorb carbon dioxide and water runoff.</td>
<td>Plan recommendation retains a portion of the property adjacent to the Cherington townhouses to create a unique linear park and to further environmental recommendations.</td>
</tr>

</table>
| Mayor Bridget Newton, City of Rockville | Affordable Housing  
The City encourages the Planning Board to strengthen the Plan’s approach to the provision of housing options that would offer a broader range and variety of housing types.  
Housing is needed for incomes lower than MPDU levels; people with disabilities; and millennials. Encourage alternative housing types.  
Transportation and Impacts Fees  
Support the continued approach to measure transportation impacts of development projects.  
Continued efforts to share transportation studies.  
Encourage that this Plan include a policy that impact fees charged for development will be sufficient to fund the necessary infrastructure improvements.  
Businesses  
Ensure that there will be small independent establishments in the Pike corridor.  
Schools  
The importance of school construction and land for schools. A significant number of City of Rockville children attend Walter Johnson Cluster schools. | The Draft Plan’s housing section will be updated.  
Initial recommendations regarding the funding of infrastructure will be discussed during the worksessions.  
The Plan recommendations could be more specific on support for small/independent businesses.  
The Plan recommends different properties to accommodate an elementary school. |

<tbody>
<tr>
<td>Abbe Milstein, Luxmanor Citizens Association</td>
<td><em>Schools</em>&lt;br&gt;  School situation is dire. Continuing pattern of disregard for real school overcrowding and exacerbate insufficient school planning and rapid development.  <em>Schools</em>&lt;br&gt;  School size impacts on student achievement based on Maryland State Department of Education report. School sizes should be 700 for elementary; 900 for middle schools; and 1,700 for high schools. Many schools in the WJ Cluster exceed the State’s guidelines.  <em>Schools</em>&lt;br&gt;  Significant enrollment growth is anticipated within the next 5-10 years. For example, WJ High is projected to have 2,800 or more students by 2021.  <em>Schools</em>&lt;br&gt;  Schools and infrastructure must be in place prior to additional residential development. Net zero energy school.  <em>Sustainability/Infrastructure</em>&lt;br&gt;  Support for retention of existing wooded areas and additional tree canopy. Neilwood Creek has significant erosion along its banks.  <em>Sustainability/Infrastructure</em>&lt;br&gt;</td>
<td>School sizes are determined by the Board of Education. MCPS has committed to building schools at least LEED Silver or higher standard.  <em>Schools</em>&lt;br&gt;  MCPS will discuss school issues at a worksession.  <em>Schools</em>&lt;br&gt;  The Department of Environmental Protection (DEP) is restoring approximately 1,600 feet. Construction is anticipated for Winter 2017. Future development could further contribute to enhance the creek.</td>
</tr>
<tr>
<td>Jody Kline, Nicholson Plaza Shopping Center</td>
<td>Support for the Plan’s recommendation to reclassify the property from the Light Industrial (IL) zone to the Neighborhood Retail (NR) Zone.  <em>Sustainability/Infrastructure</em>&lt;br&gt;  Support for retention of existing wooded areas and additional tree canopy. Neilwood Creek has significant erosion along its banks.</td>
<td>Consistent with the Plan recommendations.</td>
</tr>
<tr>
<td>White Flint Partnership</td>
<td>Coordination and consistency between both plan areas; priorities include the funding, design and construction of transportation infrastructure.  <em>Sustainability/Infrastructure</em>&lt;br&gt;  The proposed NADMS goals are appropriate since it requires significant investments by public and private sector entities to achieve these goals.</td>
<td>Apply the same NADMS goals to both plan areas or apply the same NADMS goals for properties that are close to Rockville Pike and the Metro.</td>
</tr>

EXECUTIVE BOULEVARD FEASIBILITY ANALYSIS

Executive Summary

The Research & Special Projects (R&SP) Division evaluated the economic feasibility of redevelopment concepts proposed by Willco and Eagle Bank, two property owners in the White Flint II Sector Plan. The Area 2 team chiefly wanted to understand the economic implications of the density and building height limits they are contemplating for these two properties, and secondly to estimate how the scale of these developments would impact the surrounding market.

R&SP performed economic analysis on two sets of zoning parameters for each of the properties: one requested by the property owners through their concept plans, and a scaled-down version preferred by the Area 2 team. The zoning parameters are listed in the following table.

<table>
<thead>
<tr>
<th>Requested and Preferred Zoning – Willco and Eagle Bank Properties</th>
<th>Willco</th>
<th>Eagle Bank</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Zoning Designation</td>
<td>FAR</td>
</tr>
<tr>
<td><strong>Requested by Property Owner</strong></td>
<td>Commercial – Residential (CR)</td>
<td>3.0</td>
</tr>
<tr>
<td><strong>Public Hearing Recommendation by Planning Department</strong></td>
<td>Commercial – Residential (CR)</td>
<td>2.5¹</td>
</tr>
<tr>
<td><strong>Public Hearing Recommendation by Planning Department</strong></td>
<td>Commercial – Residential (CR)</td>
<td>2.0</td>
</tr>
</tbody>
</table>

The analysis discovered that redevelopment is economically feasible under both the more modest zoning regulations preferred by Area 2, as well as those requested by the property owners. This is aided by the fact that each property plans to demolish few, if any, or their existing improvements on-site. Thus, the economic value each owner would lose is relatively insignificant compared to the value they could create through additional development. Finally, population and growth forecasts suggest market demand is adequate to support the proposed development on these properties, as well as future development desired in the surrounding area (based on approved density in White Flint 1).

¹ The initial staff analysis examined the development potential at 2.0 FAR. The FAR was increased to 2.5 FAR, prior to the public hearing draft.
PURPOSE

The Research & Special Projects (R&SP) Division has evaluated the economic feasibility of redevelopment concepts proposed by Willco and Eagle Bank, two property owners in the White Flint II Sector Plan. As part of the analysis, the Planning Department wants to understand how the density and building height limits they are contemplating for these two properties will affect the viability of their redevelopment.

INTRODUCTION AND CONTEXT

Willco and Eagle Bank are two large property owners in the Executive Boulevard Office Park, which is near the intersection of Old Georgetown Road and Executive Boulevard. Each of their properties are improved with office buildings and surface parking: Willco owns a 21.9 acre property that includes office buildings 6001, 6003, and 6011 Executive Boulevard, while Eagle Bank owns a 5.4 acre property which includes 6010 Executive Boulevard (see Figure 1). The Executive Boulevard Office Park is located in White Flint, a mature retail and employment center that is expected to undergo large-scale redevelopment in the near-future. The properties are about one-half mile from Rockville Pike/MD 355, less than a mile from the White Flint Metro station, and adjacent to Pike & Rose, one of the first mixed-use centers expected to transform White Flint.

As part of the White Flint II Sector Plan – which both properties are located in – Willco and Eagle Bank have each requested zoning changes which they claim will help enable infill development and redevelopment in accordance with their proposed vision. Their properties are currently zoned primarily for office use, with a floor-area ratio (FAR) of 0.75 and a building height limit of 100 feet (zoning designation is

---

2 Infill development is the process of further developing under-used properties, without removing the existing improvements on the site.

3 FAR, or Floor-Area Ratio, is a measure of density. It is the ratio of a building’s total floor area to the size of the piece of land upon which it is built.
represented as EOF-0.75, H-100’ T). They are each requesting their zoning be changed to Commercial-Residential (CR) designations – which allow greater flexibility of uses – as well as greater density and building heights. Willco and Eagle Bank met with the Area 2 Planning Team and shared their development concepts for their sites. Although the Area 2 Planning Team shares their view for CR zoning, they believe a slightly scaled-down density and height than requested would better alleviate concerns about the developments’ impact on public infrastructure, neighborhood compatibility, and future development of nearby properties. Figure 2 shows the zoning restrictions that are 1.) existing, 2.) requested by the property owners, and 3.) being considered by the Area 2 Team.

The Area 2 Team principally wishes to understand whether the zoning designation, FAR, and building height that they are considering for these two properties could be onerous to the property owner’s development visions and render them economically infeasible, and to understand the economic value created from this rezoning. The Area 2 Team also wishes to understand its market impact to surrounding properties, primarily related to its residential element. Thus, R&SP conducted an analysis to estimate the economic value of these properties under the proposed regulatory conditions, and secondly, reviewed population and growth forecasts which would provide future market support.
ECONOMIC ANALYSIS - METHODOLOGY AND APPROACH

*Static Development Pro Forma*

A “static development pro forma” process was used to evaluate the economic feasibility of a project at stabilized occupancy. This point-in-time evaluation estimates the remaining value, if any, after accounting for land value, development costs, profits, and standard public exactions.\(^4\) The development feasibility analysis methodology builds an understanding of the relationships between site constraints, land use regulations, and the real estate market. The approach is intended to generate order-of-magnitude estimates that can provide general insight into whether a typical project with certain characteristics is economically feasible. In reality however, no economic model can capture the full range of variables that differ from owner to owner - such as one’s investment objectives, financial situations, and appetite for risk – to accurately determine feasibility on any individual project.

The residual value of a development can generally be calculated using the following formula:

\[
\text{Residual Value} = \\
\quad \text{Market value of the building improvements} \\
\quad - \text{Cost of the building improvements (including development, construction, soft costs, and profit)} \\
\quad - \text{Cost of public exactions (such as impact fees, affordable housing and open space)} \\
\quad - \text{Cost of land (if not yet acquired) or Change in value of land}\(^5\) (if owned)
\]

Essentially, the residual value in this analysis represents the *additional* value remaining after the full range of costs and required returns on investment are accounted for. For NEW development (i.e. vacant property), a positive residual value is normally added to the developer’s targeted return and suggests the project is feasible. A negative residual value – especially by a large order of magnitude – normally suggests a property owner is less likely to develop/redevelop without some form of economic assistance. Residual value is affected by physical factors that impact a development’s revenue and costs, such as location, permitted land uses, lot coverage, building heights and density. Typically, residual value is greatest when development potential on a property can be maximized.

However, the economics of redevelopment are more complicated because there are existing improvements which produce streams of income. The costs of both the existing improvements and land are generally “sunk”, meaning the owner of the property usually does not need to invest much capital to receive that income stream. If redevelopment requires replacement of existing buildings, the owner must decide which is more valuable: the existing improvements (receiving the income stream with little to no attendant capital cost), or the new improvements net of the

\[^4\] The “static development pro forma” accounts for and deducts the cost of land from its residual value. This is different from a traditional Residual Land Value analysis, which represents the maximum amount a developer would be willing to pay for land.

\[^5\] Change in value is the difference between the cost basis (what the land was originally purchased for) and the current market value. This value can be affected by rezoning, capital appreciation (or depreciation), or investment/ disinvestment into the surrounding environs. This change in land value is factored into decisions on whether or not to redevelop, as an increase or decrease can affect the developer’s rate of return.
capital cost of building those improvements (including the costs of demolition, relocating tenants, business interruption costs, etc.). Essentially, in order for redevelopment to be feasible, the RESIDUAL value of the redevelopment should be greater than the TOTAL value of the existing improvements that are lost as a result of the redevelopment. The owner would not need to incur additional land costs for redevelopment, unless the project involves acquisition of adjacent land.

**Proposed Development Programs**

Willco and Eagle Bank met with the Area 2 Team to propose a development program and vision for their properties as a basis for a zoning change. Proposals included a mix of new retail, residential apartments, and new hotel and/or office space. Their proposals are largely characterized as infill development rather than redevelopment: with a small exception of one of Willco’s two options, all of the existing office buildings were preserved.

As previously mentioned, the Area 2 team is contemplating zoning that is slightly lower in the densities and heights than requested by the owners. Figure 3 shows the development programs proposed by the owners, as well as modified development programs that conform to densities and heights contemplated by Area 2. These modified programs will be tested in the static development pro forma and used as the basis to determine whether the densities and heights under consideration by Area 2 enable economically feasible development opportunities. As the development programs in Figure 3 represent maximum development capacity, program elements can also be removed or curtailed in the pro forma should they generate a higher residual economic value.

</tbody>
</table>

- "Proposed" programs are those submitted by the property owner/developer. Willco submitted two concepts, which are represented as Proposed (A) and Proposed (B). "Area 2" represents adjusted programs based on Area 2 planning team recommendations; adjustments were made to FAR (Willco) and height (Eagle Bank).

- To arrive at the Area 2 Team’s modified version of Willco's development program, each land use component was averaged between Willco’s two proposed programs, then scaled down 21.31% in size (% difference between 2.54 and 2.0 FAR).

- Willco assumed the demolition of one of their office buildings in Proposed (A) – the modified development program accounted for the demolition costs in efforts to arrive at a more conservative estimate.

### ECONOMIC ANALYSIS - FINDINGS

R&SP conducted economic analysis of the Willco and Eagle Bank properties using current, localized market and construction data for revenue and cost assumptions. The residual value that each of the modified development programs need to exceed for redevelopment to occur is shown in Figure 4.

<table>
<thead>
<tr>
<th></th>
<th>Willco</th>
<th>Eagle Bank</th>
</tr>
</thead>
<tbody>
<tr>
<td>Threshold for Redevelopment (estimated value of forgone existing improvements*)</td>
<td>$57,931,034</td>
<td>$0</td>
</tr>
</tbody>
</table>

*Based on the capitalized value of the existing income stream. Average annual rents were currently estimated at $30 and office capitalization rate was estimated at 7.25%. CoStar, CBRE.

The figure above represents the total value of the existing improvements that would be lost through redevelopment. Willco has plans to demolish one of their three office buildings, and Eagle Bank has no plans for demolition. As a result, redevelopment would be feasible on Willco’s property only if residual value is over $58 million, and infill development would be feasible on Eagle Bank’s property with any positive residual value.

Figure 5 is a summary table expressing the key figures and calculations in the pro forma for each of the proposed development programs. More detailed tables as well as sources and references for key assumptions can be found in the Appendix.

</table>

<sup>1</sup> Capitalization rates and developer rates of return are blended and weighted across each market segment (retail, residential, office, hotel) within the project for one consolidated rate. Discussions with developers and industry knowledge assume developer rates of return at approximately 1.5% - 2.5% above the prevailing capitalization rate, depending on land use and market conditions.

<sup>2</sup> Hard costs include site preparation, construction, and tenant improvements as needed.

<sup>3</sup> Parking arrangements assumed one-third would be structured parking, and two-thirds would be underground parking.

<sup>4</sup> Public exaction costs are public benefits required under the standard development method, which comprise of public infrastructure improvements, transportation impact fees, school fees, moderately-priced dwelling units (MPDUs), and open space.

<sup>5</sup>The owners are expected to realize an increase in land value from the rezoning of EOF to CR, given its greater development potential based on increased flexibility of land uses and higher densities.

<sup>*</sup>An additional development program that removed new office development as a program element was tested for Eagle Bank to demonstrate that a positive residual value could be attained. This was because new office development was estimated to be economically unfeasible at this time, which fully accounted for the negative residual value of Eagle Bank’s full buildout scenario.
Because the development programs did not propose large-scale demolition and replacement of existing buildings, the threshold for redevelopment is relatively low compared to their development potential. Owners can receive proceeds from new development without generally sacrificing their current income stream, and are also aided from an increase in their land values through the rezoning. Both Willco and Eagle Bank should be able to realize economically feasible development opportunities under the zoning, density and height regulations considered by Area 2. Although the initial Eagle Bank development program generated a negative residual value ($-3.5M), this is because new Class A office construction is currently economically prohibitive in this location based on projected rents. However, a revised program without new office development resulted in a positive residual value of $16.6M, demonstrating its feasibility. This value could be even higher if office development is replaced with market-supported uses, such as a hotel or in-line retail, or delayed until stronger office market conditions emerge in the future.

MARKET DEMAND – IMPACT ON SURROUNDING AREA

The Willco and Eagle Bank properties, at full build-out under the Area 2 zoning recommendations, will create approximately 1,544 new dwelling units. This is in addition to the approximately 9,800 dwelling units that can potentially be built in the White Flint I Sector Plan (see Figure 1), the vast majority of which has yet to be developed. Because properties in White Flint I are closer to the Metro stations, MD 355, and key to funding many of the area’s capital improvements, the County wishes to understand whether the development potential for these properties will inhibit or delay anticipated development in White Flint I.

While there is no method to ensure that development in White Flint I progresses before these properties aside from staging mechanisms, R&SP believes that residential market demand should be strong in this area over the next 30 years. R&SP analyzed the total development potential within the White Flint I Sector Plan (measured as unfulfilled capacity of CR zoned properties) as a share of the County, and found that there is still sufficient market and population demand (see Figure 6).

Source: Metropolitan Washington Council of Government Regional Cooperative Forecast - Round 9.0, Maryland Department of Assessments and Taxation

8 Market rents for new office in Executive Boulevard projected at $35 per square foot annually (CoStar). Additional assumptions in Appendix.
9 Assumes an average of 1,000 gross SF per dwelling unit, which is in line with current market conditions and Willco/Eagle Bank’s assumptions.
10 This metric was used since CR zoning (as well as CRT and CRN) is usually the Planning Department’s primary means to stimulate redevelopment with greater flexibility in uses, form, and design regulations. CR properties are the primary properties expected to redevelop.
White Flint I’s development capacity represents 21 percent of the County’s share (39.6M SF). As the County is already largely built out, most population growth will occur in areas targeted for infill development or redevelopment such as White Flint; areas without targeted investment or CR zoning are generally assumed to remain stable. Thus, if White Flint were to obtain its “fair share” of County household growth – a corresponding 21 percent – it should benefit from market demand for 18,291 new households, nearly 8,500 more dwelling units than what is currently proposed in the White Flint I Sector Plan. This will also provide market support for additional dwelling units contemplated in White Flint II, and such zoning would bring a better balance between population growth and development Countywide.

CONCLUSIONS

R&SP’s preliminary analysis indicates the density and building heights contemplated by Area 2 for Willco and Eagle Bank’s properties are reasonable. Since the development concepts do not propose to remove many (or any) of the existing office buildings, the redevelopment threshold to realize these concepts is somewhat insignificant. Furthermore, there appears to be sufficient market demand over time to support the residential component of these projects, as well as expected development in the White Flint I Sector Plan.

Another common concern in these economic analyses is whether the development will be able to support structured or underground parking, as a way to promote compact development and a more walkable environment. This analysis suggests that a mix of structured and underground parking to serve the proposed uses is economically feasible on both properties.

However, the analysis revealed some key areas in Area 2’s recommendations that warrant additional consideration. As mentioned earlier, “ground up” office construction in Executive Boulevard is likely to be economically prohibitive at the current time, given its lower rates and overall leasing challenges in suburban office parks. If the Planning Department designates nonresidential uses for a large part of Eagle Bank’s property, the property could experience delayed development until market conditions change (i.e. office), or underdevelopment (one-story retail, small hotel, other) that may be in conflict with Area 2’s vision for the area. Greater provision for residential uses should be considered assuming that adequate infrastructure – such as school capacity – can be reliably provided.

Secondly, the preliminary analysis indicates that a full buildout on Eagle Bank’s property would leave less than three-quarters of an acre remaining on their 5.4 acre property. Since Eagle Bank’s official development application will undoubtedly be subject to the Optional Development Method, there will be less bargaining power to negotiate additional parks and open space, alternative building configurations, or better site designs due to space constraints. Area 2 may want to consider increasing its building height limit of 120’ to the developer requested 150’, in order to free up additional acreage. This would also have the effect of making the office

---

Optional Development Method is a process used by the Planning Department where a development approval is contingent on the developer providing a set of agreed upon public benefits. This method applies to CR properties when development applications request any floor-area ratio that is larger than 1.
properties more marketable, as greater floor-to-floor ceiling heights are a key feature desired by new office tenants.

Lastly, the analysis revealed that Willco’s entire development program could fit well within its site, leaving about 11 acres remaining on its 21.9 acre property, after all structured/underground parking and open space requirements are accounted for.\(^{12}\) Area 2 has discussed the need for additional school capacity in this area to relieve potential overcrowding in the future, most notably for a new elementary school. As new elementary schools in the County typically require a minimum of four-five acres of land, the Willco site presents a good opportunity to fit an elementary school and thus should be considered when negotiating for public benefits.

\(^{12}\) Internal roads, streets, and sidewalks are not accounted for and would be represented in a final site design.

Casey Anderson
Chair, Montgomery County Planning Board
8787 Georgia Avenue
Silver Spring, MD 20910

Dear Mr. Anderson,

As the developer of Pike & Rose in White Flint I and the owner of two large shopping centers within White Flint II, Federal Realty has a unique perspective, not to mention a significant interest, in the plans for both areas. In 2010 we strongly supported the adoption of the White Flint Sector Plan, which provided a framework for transforming the Pike District into a walkable, mixed-use activity center within the County. The White Flint II plan seeks to expand that vision to a wider area by applying the same principles employed in White Flint I while accounting for the differences between the two areas. For that reason, we support the White Flint II sector plan as well.

Overall, the White Flint II Plan (hereafter, the “Plan”) does a good job of integrating WF II with WF I to create a cohesive area, both physically and economically. The recommended road network will help link the two areas by expanding the grid network that is already underway in WF I, while the emphasis on pedestrian connections and a network of bicycle facilities will accelerate the shift away from auto-dependency in the Pike District. Economically, the Plan recognizes the importance of creating an equitable playing field between properties in WF II and WF I, both of which benefit from the projects currently underway as part of the WF I plan. While the specific method will be determined by the County Council, we agree that private sector financing from properties in WF II should be a part of the funding strategy for the staging plan projects – nearly all of which benefit property owners in both areas. A sector-wide transportation tax in lieu of transportation impact tax payments, similar to the tax currently in place on properties in WF I, would accomplish this. Likewise, we support the inclusion of staging targets in the Plan – both as a means of ensuring development and infrastructure occur in concert, as well as further leveling the playing field between properties in both sectors.

While overall we are supportive of the Plan, we do have concerns with some of the recommendations for our specific properties. At Montrose Crossing, the Plan calls for a dedicated Civic Green of at least one acre in size to be built as part of any redevelopment on the site. We are not opposed to a requirement to include dedicated green space in a redevelopment on our property; indeed, our two most recent projects – Pike & Rose and Rockville Town Square – both include dedicated parks as focal points. However, our experience in placemaking has shown us that these spaces work best when they...
seems eager to cast doubt on the White Flint Plan's designation of that location, which is not consistent with the previously approved plan. Placing the MARC station at Nicholson Court would also provide much needed connectivity across the railroad tracks for bicyclists and pedestrians. In addition, the MARC Station at Nicholson could provide thousands of existing residents non-automotive transportation options, which will be critical in achieving the Plan’s Non-Automotive Driver Mode Share goals.

Macon Road/Putnam Road
We would like to see the county-owned (MCDOT) property at the intersection of Putnam Road and Macon Road developed into a park. We have raised this issue in light of the redevelopment of the Montrose Baptist Church property. We also request, as we have done through the Montrose Baptist Church property redevelopment efforts, that Putnam Road not be opened and connected to Macon Road. While we support connectivity, we do not support increasing vehicular traffic on quiet neighborhood streets. This would ruin the character of our neighborhood, as it would surely be used as a commuter route. Page 77 of the Sector Plan includes an accessible pedestrian and bicycle pathway through the MCDOT owned right of way at the end of Galena Road. We believe this is meant to be Macon Road, and support this concept and wish to see it reflected in the bikeway network planning, which it currently is not.

The plan lacks vision for increased bike and pedestrian connectivity beyond designating bike lanes on roads. Even with separated lanes, it would seem that biking on Randolph Road would be categorized as a high level of stress for bicyclists. There is a tremendous opportunity to link Parklawn Drive to Macon Road for bicyclists and pedestrians. We want this plan to consider our residential streets for Neighborhood Greenways, which the City of Portland is currently implementing. Neighborhood Greenways are defined as streets with low traffic volume and speed where bicycles, pedestrians and neighbors are given priority. This concept could link the various neighborhoods within the sector plan, greatly supplementing the plan for bike lanes on roads.

A stated goal of the plan is to link new parks and open spaces with existing and proposed bikeways and trails. The White Flint 2 Sector Plan area abuts Rock Creek Park, there is a tremendous opportunity to connect White Flint to Rock Creek Park. Although we support the proposed addition of separated bike lanes on Boiling Brook Parkway leading to Rock Creek, it must be recognized there is no access to Rock Creek Park at the terminus. We feel this is a major missed opportunity in failing to create these linkages. We encourage connectivity via separated bike lanes or neighborhood greenways. For example, a neighborhood greenway on Macon Road could connect directly to Randolph Hills Local Park and Rock Creek Park. Many bike commuters already use this route.

Randolph Hills Shopping Center
The RCA would like to see the Randolph Hills Shopping Center zoned as a commercial residential town (CRT). We think this re-zoning should be recommended in the draft plan, currently it is listed as an option. The CRT zone, with sufficient density for development, will aid
the redevelopment of this shopping center into a neighborhood center featuring the MARC transit center and an open space for people to gather. The RCA supports the property owner's vision for community, smart growth and connectivity. We request that the intersection of Boiling Brook Parkway and Rocking Horse Road be improved when, or even before, the Randolph Hills Shopping Center redevelops. This intersection is a great source of frustration for our residents in our neighborhood. We would like to see a Capital Improvement Plan project linked with any major redevelopment.

In the Randolph Hills District, we support the vision for Loehmann's Plaza. We support the reconfiguration of Parklawn Drive and Randolph Road into a standard four-way intersection as recommended in the plan.

**Rocking Horse Road Center**

Rocking Horse Road Center was once our neighborhood elementary school, and we are eager to see it returned to such status. We support its designation as a potential location for an elementary school. There is open land around Rocking Horse Road Center, and we have requested that this land be used for the public good as a park. We would like to see the park designed for community use as opposed to yet another youth athletic field as recommended in the plan. We have several athletic fields in our neighborhood at the Charles E. Smith School, Randolph Hills Local Park and Winding Creek Local Park. We are eager to discuss potential uses, but do not believe that another athletic field in our neighborhood is the best use for the space. However, it appears the use of the area as a park is moot given that MCPS recently submitted plans to pave it for a parking lot to accommodate its current use for MCPS offices.

We support the removal of free right-turn ramps at the intersections referenced in the plan. This is a wonderful step towards making our streets safer for pedestrians and bicyclists.

In summary, we'd like to see additional modes of bike and pedestrian connectivity in the plan that connect the surrounding neighborhoods into White Flint and link White Flint to Rock Creek Park. We urge the County and State to consider the 2010 White Flint Sector Plan Location for the MARC station as the Randolph Hills Shopping Center redevelops into a more dense urban town center.

Thank you for this opportunity to share our input on the plan. We look forward to the changes being implemented in an effort to strengthen the plan.

Sincerely,
Matthew Tifford
President, Randolph Civic Association
January 26, 2017

Mr. Casey Anderson, Chair
and Members of the Montgomery County Planning Board
The Maryland-National Capital Park and
Planning Commission
8787 Georgia Avenue
Silver Spring, MD 20910-3760

Re: Comments of Willco on White Flint 2 Sector Plan ("Plan"), Planning Board Hearing
Draft ("Hearing Draft")

Dear Chair Anderson and Members of the Board:

On behalf of Willco, the purpose of this letter is to provide comments on the Hearing
Draft for the Planning Board’s consideration at the Board’s work sessions on the Plan. Willco
and its partners own approximately 34 acres in the White Flint 2 Planning Area. As shown
on the tax map in Attachment 1, the properties consist of two tracts of land. The larger of the two,
known as the “Washington Science Center,” identified in the Hearing Draft as the “Willco
Property,” is improved with three office buildings (6001, 6003, and 6011 Executive Boulevard).
The Willco Property is bordered by Montrose Parkway to the north, Executive Boulevard to the
south, and Towne Road to the east, and is directly across Towne Road from Pike & Rose. The
Willco Property is identified as Parcel A on Attachment 1. As envisioned in the 2010 White
Flint Sector Plan, the Willco Property is planned to be served by a direct connection to Towne
Road and Pike & Rose from a planned intersection of Towne Road and Rose Avenue. Rose
Avenue is currently being constructed through Pike & Rose to connect with Rockville Pike. The
Willco Property is discussed at pages 26 and 27 of the Hearing Draft.

The second parcel, known as the “Wilgus Property,” is directly north of the Willco
Property and contains approximately 13 acres. It is bordered to the south by Montrose Parkway,
to the north by Montrose Road, to the east by Towne Road, and to the west by Executive
Boulevard. This property consists of Parcels B, C, and D on Attachment 1. The Wilgus
Property is largely undeveloped and is addressed at pages 30-32 of the Hearing Draft.

These two properties present a singular opportunity for true mixed-use development in
White Flint 2. The properties are large, close to Metro, and well served by multiple transit
alternatives as well as existing and planned major roadways, pedestrian connections, bikeways,
and other infrastructure and amenities. Redevelopment of the Willco and Wilgus Properties
would provide the opportunity to continue the mixed-use initiative started by the White Flint I
would provide the opportunity to continue the mixed-use initiative started by the White Flint I Plan, extending the very successful development patterns of Pike & Rose while enhancing other existing and planned development in White Flint I. To realize this potential, Wilco has three issues which it wishes to highlight for the Planning Board:

1. **Requested Modifications to Zoning Recommendations of the Hearing Draft**

Specifically, the Chart which is found in Attachment 1 (the "Chart") identifies the various areas of the two sites, the zoning recommendations of the Hearing Draft, and the requests of Wilco for modifications to these recommendations. We believe these requests are modest, well justified and are fully supported by the goals of the Hearing Draft.

Specifically, Wilco requests the following:

- **CR-3, C-1.5, R-2.5, H-200’**, rather than CR-2.5, C-1.0, R-2.0, H-200’ on the Wilco Property (Parcel A on the Chart). This property lies north of Executive Boulevard between the intersections of Executive Boulevard and Old Georgetown Road, and Montrose Parkway and Old Georgetown Road, within easy walking and biking distance to Metro and many existing and planned amenities. As noted above, the property is planned to form an important intersection with Pike & Rose at Towne Road and the extension of Rose Avenue. The new development would add to the importance of Towne Road by providing a compatible built environment along this new street with similar densities and heights to Pike & Rose. The Wilco Property also presents an important opportunity to invigorate the lagging office market in this dated, single-use office park by providing a mix of uses and array of modern amenities that are attractive to office users. However, to achieve these goals, the densities recommended must support necessary redevelopment.

- **CR-3, C-1.5, R-3.0, H-200’**, rather than CR-2, C-1.0, R-1.5, H-200’ on Parcel D of the Wilgus Property (the closest portion of the property to Old Georgetown Road). This property has extensive frontage on Montrose Parkway and Montrose Road and is surrounded by commercial and mixed uses along with major highway infrastructure.

- **CRT-2.5, C-1.5, R-2.0, H-150’** instead of CRT-2.0, C-0.25, R-1.5, H-75’ on Parcel C of the Wilgus Property (immediately west of Parcel D). This property also has extensive frontage on Montrose Parkway and Montrose
Road and is surrounded by commercial and mixed uses. The height and density on this property should be sufficient to allow a development that is integrated and compatible with development on Parcel D.

- **CRT-1.25, C-0.0, R-1.25, H.50'** rather than R-200 on the linear strip of the Wilgus Property, identified as Parcel B on the Chart, and containing approximately 3.22 acres. As more fully discussed below, the Hearing Draft further recommends Parcel B be dedicated as a linear park.

2. **Requested Modification to Location of the Park on the Wilgus Property**

As noted, we believe Parcel B should be rezoned to CRT-1.25, with no commercial allowed and a limitation of 50 feet in height for the development of townhouses. The shape, isolated location and fact that this linear strip adjoins Montrose Parkway along its entire length make it a poor choice for a park. Townhouses at the density and heights proposed would be compatible with the Cherington townhouses to the north and would provide an appropriate transition to Montrose Parkway. Such development would also serve to animate the existing bike path along Montrose Parkway to encourage walking and biking. Importantly, rezoning of this area to permit townhouses would allow Willco to create a centralized park of approximately one acre on the Wilgus site, which would be far more accessible to surrounding developments, including Wilgus, Cherington, Hebrew Home, Monterey Apartments, Willco, and Pike & Rose. The park would be much more usable in shape, design and location and of far greater benefit to the immediate and larger community, with sufficient space for active play areas and programmed activities. Illustrative plans showing how the park could be located and integrated in Willco’s Plan for the Wilgus Property are attached as **Attachment 2.** These illustrations show not only the one-acre public park, but a 0.5-acre green space that would be connected to the park and accessible to the public. This additional space would be a more sheltered area, not directly fronting on Montrose Parkway and placed between two buildings.

It is further important to note that both the Wilgus and Willco Properties are planned to have strategically placed parkland and green areas at multiple locations. These spaces are conceptually shown on **Attachment 3.** These green spaces will be connected by future Road B-2 (see page 61 of the Hearing Draft), which will provide a new north-south connector road through the Willco and Wilgus Properties which is planned to connect to Rockville Pike.
3. Development History of the Wilgus Property Supports Rezoning of Parcel B to CRT-1.25, C-0.0, R-1.25, H-50’. Allowing Townhouses

The long development history of the Wilgus Property also supports CRT-1.25 zoning on Parcel B as requested. In summary, but for the County’s desire to acquire Parcel B for the Montrose Parkway, Parcel B would have been developed with townhouses at the same time the Cherington Townhouses were built. This conclusion is supported by the following detailed history.

- In 1967, Wilgus Associates Limited Partnership (the “Wilgus Partnership”) purchased approximately 40 acres of land located in the southeast and southwest quadrants of the intersection of East Jefferson Street and Montrose Road. As detailed further below, the property acquired in 1967 included the land now developed with the Cherington Townhouses and Parcel B.

- In December of 1970, the North Bethesda-Garrett Park Master Plan was adopted. This plan recommended construction of the “Rockville Freeway” as a 300-foot wide, six (6)-lane divided highway in the same location as the current Montrose Parkway. The proposed right-of-way consumed approximately 20 acres of the property acquired in 1967.

- In 1977, the Wilgus Partnership filed Preliminary Plan No. 1-77057 to subdivide the Original Tract into two lots (the “1977 Plan”). The Planning Board approved the 1977 Plan on March 17, 1977, but placed the above referenced 20.1 acres into reservation for the 300-foot wide Rockville Freeway right-of-way.

- To implement the reservation of the 20.1 acres, on May 26, 1977 the Planning Board adopted Resolution 77-39 placing 16.3086 acres of the 20.1 acres in reservation. On June 7, 1977, a Reservation Plat for the 16.3086 acres, identified as Parcels 4, 5 and 6, was recorded in the Land Records of Montgomery County at Plat Book 102, Plat No. 11588 (Attachment 4). Parcel 5, as shown on the plat, contained 6.0508 acres and included the area of Parcel B as shown on Attachment 4. The reservation of Parcels 4, 5, and 6 was renewed annually until 1998 by Resolutions of the Planning Board. Accordingly, Parcel B was in reservation from 1977 through 1998 but never purchased for public use, which prevented the Wilgus Partnership from developing Parcel B during that time.
• In December of 1992, the updated North Bethesda-Garrett Park Master Plan was approved and adopted. This plan continued to recommend the construction of Montrose Parkway through the same 300-foot right-of-way that included Parcel B. Despite continued efforts by the Wilgus Partnership between 1977 and 1995 to resolve whether the Montrose Parkway right-of-way that included Parcel B would be purchased by the County or allowed to develop, no action to acquire the right-of-way was taken by the County.

• In 1995, the Wilgus Partnership sold approximately 13.5 acres to Pulte Home Corporation for development of the Cherington Townhouse Community (Preliminary Plan No. 1-96009 and Site Plan No. 8-99066). At that time, Parcel B, which abuts the southern boundary of the 13.5 acres conveyed to Pulte, was still in reservation and retained in the R-200 Zone.\(^1\) If Parcel B had not been in reservation, it would have been the Wilgus Partnership’s position that the property also be developed as townhouses.

• Between 1995 and June 1998, the Wilgus Partnership continued to seek a resolution to the question of acquisition or development of its 20.1 acres in reservation since 1977 with all relevant public agencies. When no resolution could be reached and the reservation term expired on June 30, 1998, the 20.1 acres, including Parcel B, was released from reservation without acquisition by the County.

• On October 12, 1998, the Wilgus Partnership filed Preliminary Plan No. 1-99029 proposing two office buildings containing 522,700 square feet on one 8.7-acre lot located in the southwestern quadrant of the intersection of “Old” Old Georgetown Road (now Towne Road) and Montrose Road (the “1998 Plan”). The 1998 Plan proposed development in the Montrose Parkway right-of-way that was no longer in reservation. In the course of reviewing the 1998 Plan, the Montgomery County Department of Public Works and Transportation, now the Department of Transportation (“DOT”) and the Planning Board agreed to reduce the right-of-way width for the section of Montrose Parkway between Executive Boulevard and “Old” Old Georgetown Road from 300 feet to 130 feet, increasing to 215 feet at the intersection of the

---

\(^1\) The area developed as the Cherington Townhouses was rezoned R-20 in 1993 by SMA G-706 while Parcel B was in reservation for the Montrose Parkway and remained zoned R-200.
Parkway and Towne Road. This reduction took Parcel B out of the right-of-way for Montrose Parkway.

- The 1998 Plan was approved on August 30, 2002 with the reduced right-of-way width and with multiple conditions, including the requirement for the Wilgus Partnership to dedicate and construct the section of Montrose Parkway along the frontage of the property. The Wilgus Partnership objected to these later conditions of approval of the 1998 Plan and filed a Petition for Judicial Review with the Circuit Court. After filing the Petition, the Wilgus Partnership agreed to a remand to enter into settlement negotiations with the Planning Board and DOT.

- For approximately the next twelve months, negotiations continued between the Wilgus Partnership, the County (through DOT) and the Planning Board, and culminated in a settlement agreement dated July 28, 2004 (the “Settlement Agreement”). Under the Settlement Agreement, in exchange for the Wilgus Partnership’s agreement to dedicate approximately 2.3 acres for the Montrose Parkway, the Planning Board agreed to only require that the Wilgus Partnership contribute to the funding for the construction of a section of Montrose Parkway along its frontage. In furtherance of the Settlement Agreement, in May of 2005, Plat No. 23187 was recorded in the Land Record for the dedication of approximately 2.3 acres of the Montrose Parkway right-of-way. Other portions of the reduced right-of-way between Executive Boulevard and the dedicated right-of-way were subsequently acquired by the County for the Montrose Parkway.

In summary, as evidenced by the development and subdivision history outlined above, the Wilgus Partnership was effectively prevented from pursuing townhouse R-20 zoning on Parcel B and development in 1995-1996 when the Cherington townhouses were developed. The current request to zone Parcel B to CRT-1.25, C-0.0, R-1.5, H-50 would result in a consistent unit type and density as Cherington, which Wilco believes would have been the case if there had not been a reservation of its land for a 300-foot wide right-of-way.

4. Recommendation for An Elementary School Site

The Hearing Draft recommends Wilco dedicate land for an elementary school on the Wilgus Property. Dedication of land for an elementary school is not supported by the proposed development, and Wilco would need to be compensated for any land taken for a
Mr. Casey Anderson, Chair and  
Members of the Montgomery County Planning Board  
January 26, 2017  
Page 7

school. We note that Willco has offered to work with MCPS on a small site school paradigm but such a model has not been pursued by MCPS.

We believe that the several elementary sites currently available to the County in the White Flint area are sufficient, and no new sites of limited value, such as represented by this recommendation, should be planned on the Wilgus or Willco Property. A new elementary school would serve all of White Flint. There are several sites which have already been identified for dedication or acquisition by the County and are better choices to serve the need in the Walter Johnson Cluster.

Thank you for your attention to our comments. We look forward to continuing to work with you.

Very truly yours,

LINOWES AND BLOCHER LLP

RE: White Flint 2 Sector Plan Public Hearing Draft;
In Support of Loehmann’s Plaza Recommendations;
5200-5290 Randolph Road

Dear Chair Anderson and Members of the Planning Board:

This office represents Mr. Rob Rosenfeld and Rosenfeld Investment LLC, the owners of property located at 5200-5290 Randolph Road, commonly known as Loehmann’s Plaza. Recommendations for land use and zoning relative to the Loehmann’s Plaza site can be found on pages 44-46 and Map 26 of the White Flint 2 Sector Plan Public Hearing Draft.

When the property owners first became aware of the County’s interest in undertaking an effort to comprehensively envision the future of the area covered by the White Flint 2 Sector Plan (“White Flint 2”), the reaction was extremely positive. At about the same time, the owners had also come to embrace the need to start seriously evaluating what the next phase of Loehmann’s Plaza might look like and had already initiated a development feasibility study for the property. Safeway’s departure from the site in late 2015 created an opportunity to look at a first phase redevelopment of the plaza sooner than would have been possible if their lease was still in place. Encouraged by the County’s interest and effort to move forward with White Flint 2, the decision was made to accelerate pulling together a design team that would bring vision to paper and engage in discussions with M-NCPPC staff to exchange ideas and information. The resulting development schemes revealed that the site is more than capable of compatibly accommodating additional residential density than what might be allowed under the property’s current zoning.
Accordingly, our clients fully support the Public Hearing Draft's recommendation for the CR-1.75, C-0.5, R-1.5, H-75 Zone for the 10.8 acre Loehmann's Plaza site, which we believe strikes the right balance between residential and commercial density to be developed on the site. (Public Hearing Draft, pgs. 44-46)

In addition, we agree that a reconfiguration of the intersection of Randolph Road and Parklawn Drive (i.e., straightening the current curve of Parklawn Drive) into a more standard intersection configuration could offer a number of benefits. Our preliminary observations of the potential benefits to the transportation network that could result from a realignment of Parklawn Drive (previously shared with transportation planning staff) are as follows:

- Provides better spacing between signalized intersections.
- Facilitates creation of bike lanes.
- Improves pedestrian access through the intersection of the two major streets.
- Allows for elimination of the current split phasing function which will markedly improve the efficiency of the intersection.

A redesign of Parklawn Drive could also have positive benefits on a future redevelopment of Loehmann's Plaza as follows:

- Allows for a more efficient layout for the overall site that more seamlessly integrates with the surrounding neighborhood.
- Allows for better connectivity from Parklawn Drive to/from green areas and park spaces located on the west side of the site.
- Allows for more efficient and usable commercial/retail space to support/serve the surrounding community.
- Allows for a more typical street grid and opportunities for additional access points along western and northern frontages to achieve better/safer access and circulation throughout the development.
In closing, we want to express appreciation for planning staff’s work on White Flint 2 and your consideration of all the above. We look forward to continuing the dialogue with planning staff and bringing forth a redevelopment proposal for the Loehmann’s Plaza site that supports the vision set forth in the White Flint 2 Sector Plan.

Sincerely yours,

MILLER, MILLER & CANBY

Re: White Flint II Sector Plan  

Dear Mr. Anderson and Planning Board Members,

We are writing to you as counsel for Lerner Development Company, owner of the Oxford Square Apartments on Parklawn Drive within the White Flint II Sector Plan area. We respectfully request that the Planning Board rezone this property from the current R-30 zone to the CR or CRT zone to facilitate its redevelopment during the middle years of the Sector Plan’s duration.

The Oxford Square Apartments were built in the mid-1960s, and renovated in the early 1980s. The complex consists of 167 apartment units in 12 garden apartment buildings. Given the rolling topography of the site, they vary between 3—4 stories in height. The buildings and apartment units are approaching the end of their useful lives for building structural elements and systems. Although these apartments have been excellently maintained over the years by the original developing owner (the Lerner family), they lack ADA accessibility, modern fire code protection, stormwater management and efficient energy systems, and forest conservation measures. Many of the units are market rate affordable, but there are no MPDU units since the complex was constructed long before the MPDU law was enacted. A recent analysis, including technical consultations with the Department of Permitting Services, indicates that extensive renovations to these apartments are not economically feasible.

The owner proposes to maintain the current apartments for a period of at least five years following the adoption of the Sector Plan. However, at some point thereafter, the owner intends to redevelop Oxford Square by demolishing the current buildings and constructing a new multi-story building containing at least twice the number of apartment units. Given the modest rental market for Oxford Square’s location (not easily METRO accessible and distant from the core of the emerging core of White Flint), the redevelopment rents will remain market rate affordable. In addition, the owner proposes an MPDU yield of approximately 15% for an optional method project, along with a strong component of larger two and three bedroom units to facilitate family occupancies.
The Staff recommends retaining the current R-30 zoning for the property solely in order to preserve it as a reservoir of market rate affordable apartments. Doing so will preclude redevelopment, since Oxford Square is currently built to the maximum development standards of the R-30 zone. However, not only will preserving the existing zone remove any incentives for redevelopment, it will guarantee at least for the life of the Sector Plan that Oxford Square’s apartments will continue their inexorable decline into functional obsolescence devoid of MPDUs, ADA accessibility, modern fire code protection, stormwater management systems, and forest conservation measures. As an example, a recent structural survey confirmed growing concerns with the foundations of several buildings due to their original construction methods and age. These sub-optimal conditions are not equitable to Oxford Square’s current and future residents, and don’t serve the longer term interests of the County’s affordable housing policy.

We request CR or CRT zoning that would accommodate the proposed redevelopment. The density should be an FAR of 1.0, with an allocation to residential of the full amount and only 0.25 FAR for retail facilities (only site serving convenience commercial uses would be considered). The building height maximum should be 65’, which is intended to be sufficient to accommodate wood framed construction methods.

Redevelopment would enable Oxford Square to offer many more (and market rate affordable) apartment units with plentiful two and three bedroom units, in addition to MPDUs of approximately 15%. In addition, Oxford Square will be able to meet modern stormwater management, forest conservation, fire protection, ADA accessibility, and energy standards. This redevelopment—with far superior construction methods and design principles than existed in the mid-1960s when the complex was first built—will provide twice the amount of market rate affordable apartment units than currently exist and for many years to come. This result is in the public interest and strongly promotes the County’s affordable housing policy.

We respectfully request your adoption of CR or CRT zoning for the Oxford Square Apartments for the reasons described. Thank you very much.

Very truly yours,

Robert G. Brewer, Jr.

Silver Spring, MD 20910

Re: 6120 and 6130 Executive Boulevard

Dear Chair Anderson and Members of the Montgomery County Planning Board:

On behalf of Monument Realty and Angelo Gordon, an affiliate of AG Lowe Executive Plaza Owner, LLC, ("Angelo") the owners and managers of 6120 and 6130 Executive Boulevard (collectively, the "Property"), we provide the following comments on Staff’s Public Hearing Draft of the White Flint II Sector Plan, dated November 2016 ("Working Draft"). In summary, because the existing EOF zoning does not provide sufficient flexibility to encourage redevelopment of the vacant office buildings on the Property, we are requesting that the Property be rezoned CR-1.0, C-1.0, R-1.0, H-100'.

Background

The Property is zoned EOF 0.75, H-100T and is improved with two vacant office buildings. The buildings have been vacant since our large tenant, NIH, moved out three years ago. Given the age of the buildings (which were constructed over 30 years ago) and the changing office market, Angelo has struggled to find new tenants. Due to the large office vacancies, the traditional GSA tenant leases formerly common in this area no longer make economic sense, as the GSA lease rates continue to fall. In the last year, Angelo opted out of a GSA prospectus because it made more economic sense to keep the building vacant.

We understand that the Planning Department commissioned Bolan Smart to study the adaptive reuse of office buildings along Executive Boulevard in White Flint. Angelo's Property was specifically studied as part of Bolan Smart's analysis. Angelo disagrees with the findings contained in Bolan Smart's report — "Adaptive Reuse: Executive Boulevard and Rock Spring Office Markets," dated May 2016 — which indicates that these buildings are ripe for residential conversion. Angelo and Monument, as well as others, have looked into the potential for residential conversion of these buildings, but the economics are complicated for converting aging office buildings, such as these. The costs associated with a residential conversion of these aged buildings versus the residential rents achievable in the market for such a product make this an infeasible option.
The Honorable Casey Anderson  
January 12, 2017  
Page 2

Angelo does not foresee office use being viable on this Property in the long term. Although, with a great deal of effort, Angelo has secured a short-term lease for one of the buildings that will commence in 2018, this is a one-off type of lease that Angelo does not expect to see again. Angelo views this as a short-term "band aid solution" to a long-term problem.

Need for More Flexible Zoning

Angelo needs a creative solution for the long-term success of this Property. The existing EOF zoning, which limits residential use to no more than 30% of the overall development, does not provide the tools to redevelop. While office use may make sense in other locations within the White Flint II Sector Plan area, particularly in Metro adjacent locations, the persistent vacancies along Executive Boulevard make it evident that office use is not currently the highest and best use of the site and is not a long-term strategy on this Property. Rather, the Property presents a unique opportunity for residential redevelopment, for which there is an evident market. However, this redevelopment cannot be accomplished under the existing EOF zone.

Requested Changes to Draft Plan

To ensure the future use and long-term success of this Property, we request that the Property be rezoned CR-1.0, C-1.0, R-1.0, H-100'. We are only asking for the overall density to be increased by 0.25 FAR and are retaining the existing 100' maximum height. While this requested change in zoning does not represent a significant increase in overall density, the requested CR Zone will give Angelo the tools needed to revitalize the vacant site and introduce new public amenities.

Benefits of Proposed Redevelopment That can be Achieved by Rezoning

Redevelopment of this Property should be encouraged for several reasons.

1. Residential Redevelopment will Provide Additional Desired Connections

The Property is uniquely situated in close proximity to Luxmanor Park, Luxmanor Elementary School and Green Acres School. Because of this proximity, residential redevelopment of the Property can provide a new private drive connection from Green Acres School to Executive Boulevard and, as desired by the Draft Plan, new pedestrian and bike connections to these surrounding parks and schools.

Green Acres Vehicular Connection. We understand from Staff that the community has expressed a desire for an alternative connection to the Green Acres School. As such, we have been working with Green Acres School to accommodate a new private driveway access from Executive Boulevard to their school, through our Property, as part of a residential redevelopment of the site. (See Attachment "A"). We understand that Green Acres is very interested in this potential future connection, as this will provide for an alternative to the current, sole access through the Luxmanor residential neighborhood. This alternative access point will benefit students and faculty of Green Acres, as well as the surrounding community.
Pedestrian and Bicycle Connections. Additional pedestrian and bicycle connections are one of the priorities of the Draft Plan. Based on this, Angelo has had the design firm Perkins Eastman study these proposals and, as shown on the concept plans, Perkins Eastman has determined that Angelo can accommodate these important connections on the Property when the Property is redeveloped. These include a pedestrian and bicycle link to the Luxmanor Park and Elementary School and to Executive Boulevard. These vehicular, bike and pedestrian connections however, cannot be achieved without redevelopment under the CR zoning designation. (See Attachment "A").

2. Residential Redevelopment will Provide Desired Transitions

The Property is located in the southwest corner of the White Flint II Sector Plan area. Given the Property's edge location, redevelopment will promote the Sector Plan's goal of providing adequate transitions between new development and existing neighborhoods. Our conceptual design proposes to locate townhomes closest to the existing single-family residential homes in the Luxmanor neighborhood and multi-family residential closer to Executive Boulevard. Accordingly, this redevelopment will soften the plan edges and provide a gradual transition between the single-family residential uses outside the Plan boundary and the commercial uses beyond the Property. (See Attachment "B").

3. Stormwater Management

Residents of the Luxmanor neighborhood, who live in close proximity to the Property, have expressed issues with stormwater management. Currently, given the age of the development, there are no known stormwater management facilities on the Property. As such, residential redevelopment provides an important opportunity to greatly improve the treatment of stormwater runoff, for both quality and quantity, on-site. Specifically, redevelopment would allow for the introduction of Environmental Site Design ("ESD") to the Maximum Extent Practicable. Additionally, other environmental improvements could be incorporated into the future redevelopment, including further preservation of the stream bed currently located within the forested buffer on the south side of the Property.

Conclusion

To achieve these community benefits, including the new vehicular, pedestrian and bicycle connections, we need a zone that will give Angelo the tools to redevelop. Because the EOF Zone does not provide sufficient flexibility to encourage redevelopment, we ask that the Property be rezoned to CR 1.0, C-1.0, R-1.0, H-100'. The CR Zone will serve as a catalyst for change on this Property, to address the vacancies. Furthermore, residential redevelopment, with the connections proposed, will energize and activate this area of White Flint. Again, this requested change in zoning does not increase the height, nor does it represent a significant increase in overall density (an overall increase of 0.25 FAR). Rather, the requested CR Zone will provide greater flexibility for residential development on the property.
We appreciate the Board’s consideration of this request, and ask that this letter and attachments be included in the record for the Sector Plan. Thank you.

Sincerely,

Stacy P. Silber

Casey Anderson, Chair, and
Members of the Montgomery County Planning Board
The Maryland-National Capital Park and Planning Commission
8787 Georgia Avenue
Silver Spring, MD 20910-3760

Dear Chair Anderson and Members of the Planning Board:

On behalf of The White Flint Partnership ("Partnership"), the purpose of this letter is to provide testimony on the White Flint 2 Sector Plan, Public Hearing Draft dated November 2016 ("WF2SP"). As you are aware, the Partnership is composed of major owners of some of the largest redevelopment properties within the White Flint I Sector Plan ("WFSP"). We have worked closely over the last eight years with M-NCPDC, the County Executive, County Council and the State in implementing the successful vision of the WFSP. Our joint efforts have spawned intensely active community organizations of residential, business, government and property owner interests. Members of the Partnership are committed to the County and the success of the WFSP.

We are very much in general support of the WF2SP. In addition, the Partnership appreciates that the WF2SP acknowledges the importance of consistency with the goals, priorities, and implementation of the WFSP. The Partnership envisions that the WF2SP can complement the vision of the WFSP as long as the County ensures coordination and consistency between these two adjoining sector plans. As a part of this coordination, the County will hopefully continue to recognize the long established priorities within the WFSP, priorities which are instrumental to the success of the original plan. For example, these priorities would include, but not be limited to, the funding, design, and construction of the transportation infrastructure which is critical to full implementation of the WFSP. The transportation infrastructure priorities in the WFSP are the essential stepping stones to achieving the Non-Auto Driver Mode Share Goals (NADMS) placed on our developments, and they are the key to enabling individual redevelopment projects to move forward from one stage to the next. In fact, the transportation infrastructure envisioned for the WFSP will ultimately be instrumental to the success of both sector plans. In addition, the Partnership would urge the County to apply the same NADMS goals to the two sector plans. When compared with the WFSP plan area, large portions of the WF2SP plan area are just as close to Rockville Pike and the Metro. At the very least, those portions of the WF2SP plan area should have the same NADMS goals at the WFSP plan area.
Casey Anderson, Chair, and
Members of the Montgomery County Planning Board
January 12, 2017

As the proposed WF2SP continues through the County's approval process, the Partnership would welcome the opportunity to engage in in-depth discussions of any aspects of these comments.

We thank you for your consideration of our comments.

Best Regards,

THE WHITE FLINT PARTNERSHIP

January 10, 2017

Dear Mr. Anderson,

I write regarding the White Flint 2 Sector Plan (WF2) being presented in draft form to the Planning Board on Thursday, November 10.

I am disappointed in the WF2 plan for one major reason: the disheartening lack of connection between our 1300 home neighborhood to the White Flint Metro and White Flint area. This lack of connection will further set apart our neighborhood- part of the Randolph Civic Association- from the expected economic growth of the White Flint area and continue to stymie our access to amenities compared to the White Flint 2 residential areas to the west. Our neighborhood wants and deserves an option to walk or bike to the White Flint Metro and the surrounding area of shopping, entertainment, dining and employment.

I am currently a member of the Montgomery County Bicycle Master Plan Advisory Committee and understand the vision and the challenges of the County to create a more bikeable and walkable county. I commend the County on its efforts thus far. It is with plans such as the WF2 that those visions become reality so I urge you to consider including a bike/ped connection to our 1300 home neighborhood to the White Flint area.

The actual distance from Boiling Brook Parkway to the White Flint Metro is one mile - a very bikeable/walkable distance for the majority of our neighborhood. However, due to the current lack of connection over the CSX tracks, the distance is nearly three miles including the steep graded hill and high motor vehicle volume of Parklawn Drive. Achieving a short, convenient, and safe route from Randolph Hills, an ethnically diverse and comparatively lower income neighborhood, to the Pike & Rose area and the White Flint Metro would encourage more biking and walking and give this plan a more equitable approach. We are not asking for access for motor vehicle traffic but simply a bike/ped connection that will reduce traffic congestion and support active transportation.

I realize connections across CSX tracks are not easy, however, if this connection is not made in the White Flint 2 sector plan our neighborhood will face another 50 or more years of disconnect to our closest Metro and the major economic center of our area. I urge you to reconsider a bike/ped east-west connection prior to the Planning Board approval.

Thank you for your consideration.
Sincerely,
Alison Dewey

Re: Testimony on Draft Plan for White Flint 2

Dear Mr. Anderson:

This letter presents testimony to the Montgomery County Planning Board for consideration as you review the draft plan for the White Flint 2 Sector of Montgomery County. As White Flint 2 is immediately south and adjacent to the City of Rockville and a portion lies within our Maximum Expansion Limits, the plan will have a significant impact on Rockville.

In general, we appreciate the desire to facilitate the conversion of this area into a mixed-use walkable and bikeable environment that can be served well by transit. This approach is similar to that which we have taken in our recently approved Rockville Pike Neighborhood Plan, especially near the Twinbrook Metro Station where redevelopment is most likely.

We appreciate that the draft takes into account reducing impacts on adjacent single-family neighborhoods in Rockville's Montrose community, by keeping maximum heights along Jefferson Street lower than those along Rockville Pike. We strongly urge you to maintain these protections in the plan that you forward to the County Council.

We respectfully request consideration of changes in the following areas:

Affordable Housing
Rockville appreciates and supports that the draft plan recommends an increased percentage of Moderately Priced Dwelling Units (MPDUs) and preserves some of the existing "market affordable" housing in the sector. However, Rockville encourages the Planning Board to strengthen the plan's approach on the provision of housing options that would offer a broader range and variety of housing types. Housing is also needed for those whose incomes are lower than MPDU levels, those with disabilities, "millennials" and others who need places to live but are unable to afford the prices of "luxury level" new units that are being built in the corridor. We also encourage you to be creative in thinking about how to incorporate alternative housing types, such as duplexes and small apartments.

Transportation and Impacts Fees
We strongly support the approach of continuing to measure the transportation impacts of development projects, in contrast to what occurs in the White Flint sector. You may know that the City and County have a memorandum of understanding in which we share with each other traffic impacts of development projects. We
appreciate that this plan leaves in place the local area traffic studies so that we have
an opportunity to comment on projects as they are being reviewed.

However, we also strongly encourage this plan to include a policy that impact fees
charged for development will be sufficient to fund the necessary infrastructure
improvements, in transportation and other areas. We have seen that fees charged
are sometimes not as much as is needed and the county and municipalities are left
to make up the difference.

Variety of Businesses
We appreciate that new retail and other businesses will be accommodated in the
plan area. We encourage you to think about how to ensure that there will be small
independent ("mom and pop") establishments in the Pike corridor, rather than only
in the existing industrial areas in the eastern portion of White Flint. These types of
establishments provide an important level of interest, variety and support the
diversity we want as Montgomery County.

Schools
Rockville also wishes to express as strongly as we can, the importance of making
sure that school construction and land for such schools, will be budgeted and
designated to manage the development that is projected under this plan. A
significant number of Rockville children attend schools that serve this plan area,
including Tilden Middle School and Walter Johnson High School. As you know, this
cluster continues to experience over-capacity conditions. Please make sure that
your plan, and other regulations (including the Subdivision Staging Policy) ensures
that Montgomery County and Rockville children are attending schools that are not
over-crowded.

As a final note, we want to express our sincere appreciation to Montgomery County
Planner Nkosi Yearwood. His presentation and the discussion with the Council on
January 9th were very beneficial and he answered our questions well and with an
open spirit.

Sincerely,

Bridget

Re White Flint 2 Sector Plan - Kaiser Permanente - 6111 Executive Boulevard and 2101 East Jefferson Street Properties

Dear Chairman Anderson and Board Members:

We represent the Kaiser Foundation Health Plan of the Mid-Atlantic States, Inc. ("Kaiser"), the owner and occupant of two properties within the White Flint 2 Sector Plan (the “Sector Plan”) area. Kaiser’s regional lab facility is located at 6111 Executive Boulevard (the “Lab Property”) and its regional administrative headquarters building is located at 2101 East Jefferson Street (the “Headquarters Property”) (see attached zoning map identifying both of the Kaiser Properties). Kaiser is in the midst of a strategic planning process to assess its current and future operational needs in the Mid-Atlantic region and how best to use its land holdings to address these needs. Kaiser is proud of its growing membership in Montgomery County and the surrounding areas, and plans to expand and upgrade it facilities as necessary to meet these growing demands. In this regard, although there are no immediate plans to expand the facilities on the Headquarters Property, there is a pressing need to upgrade and enlarge the laboratory facilities on the Lab Property. In order to relieve some of this pressure, Kaiser is installing a 6,000-square foot modular facility on the Lab Property to help until a larger facility can be approved and constructed. We are hopeful that the Sector Plan will support this immediate initiative as well as potential future growth.

The Lab Property consists of 4 acres of land, half of which is developed with a small building (22,000 square feet) and a surface parking area. The existing zoning is EOF 0.75 H-100 T, and it is included as part of the “Executive Boulevard North” area of the Sector Plan (pages 26-27). The Sector Plan proposes maintaining the current zoning (except removing the “T”). Kaiser does not object to this zoning as it should allow for sufficient density to expand its lab facility and use of the Lab Property. Kaiser hopes to file development plans in the near future for this expansion.

As for the Headquarters Property at 2101 East Jefferson Street, the Sector Plan proposes rezoning this from the EOF 0.75 H-100, to the EOF 1.5 H-100. As mentioned in the Sector Plan at page 29, this will eliminate the current non-conforming building situation. Kaiser appreciates and supports this rezoning.

DMEAST #27964802 v3
Like many property owners in the Sector Plan area, Kaiser hopes to help improve the overall viability and sustainability of this area, and hopes that the implementation policies ultimately adopted will help further these important goals. Thank you.

Sincerely,

Emily J. Vaias

Re: White Flint 2 Sector Plan Public Hearing Draft

Dear Chair Anderson and Members of the Planning Board:

I am writing on behalf of my client, Guardian Realty Investors, LLC (“Guardian”), to expand on the testimony I delivered at the public hearing on January 12, 2017. Guardian has three principal areas of concern: the zoning of its property, staging, and forest along Neilwood Creek.

Zoning of 6000 Executive Boulevard

Guardian owns 6000 Executive Boulevard, a tract of ± 6.8 acres at the southwest corner of Old Georgetown Road and Executive Boulevard, which is currently developed with a seven-story office building and related surface parking. Guardian’s property is diagonally across the street from Pike & Rose and within half a mile of the White Flint Metro Station (walking distance from Guardian’s property to the Metro station is approximately the same as from Pike & Rose’s 200-foot “Pallas” high-rise).

The Public Hearing Draft of this plan calls for highlighting properties that can improve connections between districts, promoting compatibility between new development and adjacent high-density development as well as low-density residential communities, and anchoring the southwest corner of the Western Workaround – precisely where Guardian’s property is located – to create an architectural gateway into the White Flint 1 area. Unfortunately, the zoning and height recommendations for Guardian’s property are insufficient to allow a building on the southwest corner that will serve as an architectural gateway, particularly in light of higher ground and taller height limits on neighboring properties.
As shown on the attached Grade and Height Study, the center of Guardian’s property sits 15 feet below the grade of the nearest office building across Executive Boulevard, 28 feet below the grade of the Pallas Apartments at Pike & Rose, and 16 feet below the grade directly across Old Georgetown Road, at the southeast corner of the intersection of Executive Boulevard and Old Georgetown Road. The existing seven-story building on the site has a top-of-building elevation 90.3 feet lower than the height recommended for the property directly across Executive Boulevard, 146.4 feet lower than the Pallas Apartments, and 41.3 feet lower than the height permitted for the property directly across Old Georgetown Road, at the southeast corner of the intersection.

In light of the grade differences and the finished height of the Pallas Apartments, Guardian will require significant height to construct a building that meets the Sector Plan’s goal of improving connections between districts, promoting compatibility with both high- and low-density development, and anchoring the southwest corner of the Western Workaround with an architectural gateway into Executive Boulevard and White Flint 1. The 120-foot height limit recommended in the Public Hearing Draft (see p. 29) is insufficient. Given the prominent location and the heights approved and/or built on surrounding corner properties, Guardian requests a height limit of 200 feet. This will match the height limit at the Pallas Apartments, but will result in a building with a lower building height elevation due to the lower grade of Guardian’s property.

Together with a maximum height of 200 feet, Guardian requests a corresponding density of 2.5 FAR, with 2.25 Commercial and 2.25 Residential, an increase of .5 FAR over the recommendation in the Public Hearing Draft (see p. 29). This density is justified by Guardian’s location ½ mile from Metro and diagonally across the street from Pike & Rose. In addition to its relationship to nearby high-density development, Guardian also recognizes its relationship to adjoining low-density development. Therefore, Guardian would have no objection to adding language to the sector plan requiring building heights to step down to 75 feet along its southern property line, abutting Neilwood Creek. Guardian plans to construct infill, mid-rise residential development on the southern portion of its site, designed to be fully compatible with nearby neighborhoods.

Staging of Development

The staging plan proposed in the Public Hearing Draft of this plan imposes extreme limitations on White Flint 2 by tying development to substantial public improvements that could take years to accomplish, some of which are not in the County’s or property owners’ control. The proposed staging raises fairness issues, particularly when compared to White Flint 1, which was subject to similar staging, but with much greater density and height incentives in return. The staging plan proposed for White Flint 2 would limit the entire area to 1,800 dwelling units and 900,000 square feet of non-residential development until eight specified public improvements or
events takes place. Three of these elements, in particular, risk suspending White Flint 2 in phase 1 for an indefinite period, likely to extend several years into the future:

A. **Completion of the Western Workaround.** In the White Flint 1 plan, contracts must be issued for portions of the Western Workaround for the area to proceed from Phase 1 to Phase 2, but completion of these improvements is required only to go from Phase 2 to Phase 3. In the current draft of the White Flint 2 plan, the entire Western Workaround must be completed before the area can leave Phase 1. This is a clear effort to hold back White Flint 2 while allowing White Flint 1 to move ahead or not, at the prerogative of property owners. In our view, the County should not artificially limit development opportunities in White Flint 2 out of concern that White Flint 1 is moving more slowly than expected to reach its potential, and needs to be sheltered from potential competition. Guardian believes that a more vibrant Executive Boulevard will be helpful to the entire White Flint area and should be promoted, not discouraged. Moreover, the misplaced concern about competition between White Flint 1 and White Flint 2 could be resolved, at least in part, by adding White Flint 2 properties to the White Flint Special Tax District, so that properties in both planning areas contribute to the Tax District on the same basis. **This element should be moved into Phase 2 of the Sector Plan, as it is for White Flint 1.**

B. **Requirement that MCPS must decide how and when a new elementary school will be programmed for the Walter Johnson Cluster.** It may be many years before MCPS makes these decisions, given that the School Board recently voted to convene another study group for the Walter Johnson Cluster before making any decisions. In addition, the new superintendent recently found that there is insufficient need for a new elementary school within the current six-year capital planning period. School planning decisions rest entirely in the discretion of the School Board, so this element of the proposed staging would place development in White Flint 2 entirely in the hands of the MCPS. If MCPS chooses to wait 10 years to determine how and when a new elementary school will be programmed for the cluster, the entire White Flint 2 planning area will be limited to 1,800 dwelling units and 900,000 square feet of non-residential development for that entire period. **This element should be removed from the phasing plan.**

C. **Requirement that the Maryland Department of Transportation conduct a feasibility study for an infill MARC station and decide whether a new station should be located in the plan area.** It is impossible to tell if and when such a feasibility study or decision on a station will be part of MDOT’s work program. The idea has been discussed for a long time, and a new station was recommended in the White Flint 1 plan more than six years ago, with no indication since then that it has moved forward. A MARC station study was not part
of the staging requirements for White Flint 1, and should not be a requirement for White Flint 2. It is particularly inappropriate for the Executive Boulevard portion of White Flint 1, which would be largely unaffected by a new MARC station due to its distance from the rail line. The relevance of a possible new MARC station is strictly limited to the portion of White Flint 2 west of Rockville Pike and south of Montrose Road – the eastern part of the “bow tie”. This element should be removed from the staging plan or limited only to the eastern part of the planning area.

Forest along Neilwood Creek

The Planning Board Draft of this plan recommends on pages 28 and 51 preservation of the entire 14 acres of existing forest that runs along Neilwood Creek, between the Executive Boulevard office buildings and the adjoining Neilwood and Luxmanor residential communities. Guardian considers this recommendation too broad, given the plan’s goals for development and connectivity, as well as existing utility easements in the area. We would suggest, as an alternative to the language on page 28 (with analogous language on page 51), the following: “This plan recommends, where utility easements do not conflict, protection of the stream valley buffer through forest conservation or naturalization, while allowing for trails and open space to connect the residential neighborhoods to the development and amenities on Executive Boulevard.” This language would ensure adequate forest preservation to protect Neilwood Creek and retain a forest buffer for the adjoining single-family homes, while allowing for appropriate connections, open space, and active use of land outside the stream valley buffer.

We thank you for your time and attention to our concerns, and look forward to discussing these issues with you at future work sessions.

Sincerely yours,

BREGMAN, BERBERT, SCHWARTZ & GILDAY, LLC

GRADE TO ROOF COMPARISONS

6000 EXECUTIVE BOULEVARD

GRADE & HEIGHT STUDY

JAE 1-24-17

BUILDINGS FROM GRADE
Dear Montgomery County Planning Board:

There is much to like in the proposed White Flint 2 plan, but we have fairly long list of changes we'd like to see. I will highlight those changes today. More detailed information about our suggestions can be found in our written testimony.

School Capacity

1. We are pleased that plan suggests dedicated sites for the elementary school needed in the White Flint area to address school capacity. While we are not advocating for any site in particular, we agree that dedicating sites in the plan is essential to addressing current and future school overcrowding.

Connectivity

2. We strongly support the connectivity outlined in the plan, especially the bike paths along Randolph Road and Parklawn Drive. We believe that bicycle and pedestrian connectivity is crucial to the success of this area.

3. We are, however, quite disappointed that there was no solution to creating a pedestrian-bike path over the railroad tracks to connect White Flint 2 and White Flint 1. We would very much like to see such a connection included in the plan. While we acknowledge there are engineering and other challenges creating a bicycle-pedestrian path over the railroad tracks, we believe that difficulty is not a reason to omit a needed connection from the plan. This pedestrian-bike path should be incorporated into the future MARC station.

4. To enhance connectivity and encourage walking between White Flint 1 and White Flint 2 area, we would like to see a sidewalk included on the east side of Route 355 along the bridge over Montrose Parkway to connect with the sidewalk that ends in front of Montrose Crossing.

5. To enhance pedestrian access, we request a crosswalk on the east side of Towne Road at the intersection Montrose Parkway as well as a pedestrian path through the park and ride lot to connect the Monterey Apartments, the Jewish Community Center, and other properties with Rockville Pike.

6. We support a lighted pedestrian path behind Executive Boulevard near Luxmanor Elementary.

7. We support the plan's re-configured intersection at Parklawn Drive and Randolph Road to ease traffic, increase walkability, and provide a better site for the redevelopment of Loehman's Plaza.
8. We support the reconfiguration of the intersection of Boiling Brook Road and Rocking Horse Drive. The current intersection is confusing and dangerous for both cars and pedestrians.

9. We recommend a signalized intersection where the new Rose Avenue intersects at Hoya Street at the Willco property. Both Federal Realty and Willco want this intersection and are willing to fund it. An intersection here is critical to achieving the goal of extending the White Flint 1 street grid into White Flint 2 while providing a much needed mid-block crossing for pedestrians and vehicles.

10. We suggest the plan more clearly define, with detailed larger illustrations, how the roadways, bikeways, and pedestrian paths will connect with White Flint 1 so that their recommended locations can be better understood.

11. A MARC station should remain part of the plan.

**Office, Business, Industrial, and Residential Space**

12. We very much would like to see more innovative office and residential concepts included in the plan. These might include micro-units, shared housing, and condominiums and apartments that could be used for either residential or office purposes in the same building. These types of creative residential and office buildings are being constructed and leased in other areas in our region. The plan should add language to specifically encourage taking advantage of the Zoning Ordinance's bonus density for "development that increases the variety and mixture of land uses, types of housing, economic variety and community activities" under Section 4.7.3.D.

13. We suggest that the White Flint 2 plan include language to encourage new small businesses, such as an incubator. The plan should add language to specifically encourage the retention of locally owned small businesses. Emphasis should be added to refer to the density points under Zoning Code Section 4.7.3.D.7, regarding "Small Business Opportunities: Up to 20 points for providing on-site space for small, neighborhood-oriented businesses."

14. We would like to see the plan encourage traditional and innovative senior housing options.

15. We endorse keeping light industrial space in the White Flint 2 area but would support plans to change the light industrial space in and around Randolph Hills Shopping Center to a flexible, mixed-use, higher density, residential-commercial zoning.
16. While we appreciate the need to have some light industrial space in the down-county area, we would like the Planning Board to consider creating a flexible mixed use zone around the Nicholson Court area as it is quite close to metro. We support the request for Oxford Square to have a density of 1.0 F.A.R to increase the stock of low and mid-rise residential units.

Affordable Housing

17. Apartments that are designated market rate affordable housing will eventually become obsolete. They also lack any MPDUs, ADA accessibility, modern fire code protection, storm water management systems, or forest conservation measures. A large portion of housing costs are related to utilities. As these “market rate affordable” units further decline and are not modernized, these costs will increase. Additionally, nothing is better at reducing housing costs than increasing supply. Therefore, we do not support the plan’s recommendation to effectively under-zone specific properties because they are currently providing market rate affordable housing. The law of unintended consequences is immutable. Zoning should permit the economically feasible redevelopment of older residential properties so that a variety of housing types can be part of the mix of properties in White Flint 2. This would also permit more MPDUs and hopefully units in a variety of sizes.

18. The plan discusses preserving affordable housing through the use of tax credits and other financing tools, but it does not explain them in any detail. The plan should describe such vehicles so the Council may evaluate their efficacy.

Public Space

19. We applaud the plan’s goal to create 12 acres of public space. However, we would like to see innovative public space that meets the needs of residents, not just the creation of small contemplative plazas or athletic fields that people from other parts of the county would drive to White Flint to use.

Staging and Implementation

20. Regarding Implementation Phase 1 recommendations, we request that you eliminate the MDOT study as a staging requirement. Merely conducting a study does not add density nor does it provide any concrete infrastructure improvement.
21. The approved White Flint 1 Plan and the proposed White Flint 2 Plan both recommend a shuttle system. We think that Pike District businesses, residents and commuters would all benefit from implementation of a circulator system at the earliest practicable date. A dedicated and branded circulator system would greatly enhance the visibility the Pike District. To expedite implementation, the circulator feasibility and planning study could be undertaken in 2017, and a circulator system could be in operation in time for new development in the approved White Flint 2 plan area.

22. The Non-Auto Driver Mode Share (NADMS) goals are a key mechanism for controlling traffic congestion and promoting pedestrian-friendly connectivity and walkability in the Pike District. However, the White Flint 2 Plan recommends lower NADMS goals than the White Flint 1 Plan:

<table>
<thead>
<tr>
<th></th>
<th>Phase 1 NADMS</th>
<th>Phase 2 NADMS</th>
<th>Phase 3 NADMS</th>
</tr>
</thead>
<tbody>
<tr>
<td>White Flint 1 (approved)</td>
<td>34%</td>
<td>42%</td>
<td>50%</td>
</tr>
<tr>
<td>White Flint 2 (draft)</td>
<td>27%</td>
<td>35%</td>
<td>42%</td>
</tr>
</tbody>
</table>

We can understand why White Flint 2 areas east of the CSX tracks might have lower NADMS goals. However, those portions in the western part of the White Flint 2 area that are just as close to Rockville Pike and metro as properties in the White Flint 1 area should have the same NADMS goals as the White Flint 1 plan area.

23. Finally, there must be greater clarification how White Flint 1 and White Flint 2 will work together for the betterment of both. For example, the plan must articulate how the improvements made possible by the special White Flint 1 taxing district, improvements that impact White Flint 2, will be funded so that it is equitable to all parties in both White Flint 1 and 2, including the community. The plan must also delineate how development of White Flint 1 and White Flint 2 properties will be coordinated so that the Pike District is developed in the fastest and most successful way possible.

In particular, if development is “locked” in White Flint 1 due to any of the staging requirements not being met, will it also be “locked” in White Flint 2? If not, will it be possible to justify the redevelopment of properties further from metro while closer proximity properties are unable to proceed?
Because we represent all facets of the community and because the nearly 2,000 Friends of White Flint supporters live, work, and play in the Pike District, we hope that you will include our suggestions in the final White Flint 2 Sector Plan. Thank you.

Sincerely,

Amy Ginsburg
Executive Director
January 25, 2017

The Honorable Casey Anderson, Chair
and Members of the Montgomery Planning Board
Maryland-National Capital Park & Planning Commission
8787 Georgia Avenue
Silver Spring, MD 20910

Re: White Flint 2 Sector Plan

Dear Chairman Anderson and Members of the Board:

As you are aware, property owners on Executive Boulevard including The Ronald D. Paul Companies, Inc., Guardian Realty Investors, Willco, Monument Realty, and Peel Properties have been working in conjunction on the White Flint II Sector Plan (“WF2”).

The Planning staff’s stated vision of the WF2 area was to complement the 2010 White Flint Sector Plan (“WF1”) by providing opportunities for infill and transitional development at key locations with the added goal of helping transform commercial properties, such as those on Executive Boulevard, into vibrant, mixed-use urban places.

We share the goal to transform this area into an extension of the redevelopment efforts in WF1. Executive Boulevard, as the Gateway to WF1, is walking distance from the White Flint Metro Station and shares overlapping transportation infrastructure issues with WF1, especially regarding construction on the new Western Workaround and many other infrastructure needs for WF1.

To help address the growing transportation issues in the entire White Flint area, our coalition has spearheaded conversations with County Executive Leggett and his staff about our interest in establishing a White Flint shuttle bus service akin to the Rock Spring Park Express shuttle that began operation in July 2016. The proposed White Flint shuttle would operate during peak hours Monday-Friday and circulate between the White Flint Metro Station and various stops near office buildings on Executive Boulevard and in WF1.

Our coalition is committed to helping solve the transportation needs of our tenants and the community. To that end, we are prepared to entertain a discussion with the Planning Board, Executive Branch and Council regarding the development district issue in WF1 and our potential inclusion in the WF1 Special Taxing District for transportation if zoning, density, and height issues are sufficient to incentivize development as was provided in WF1. We are aware of the tremendous shortfall of monetary funds due to lack of development in WF1 to cover the costs for infrastructure in WF1.

On the issue of schools, it is our understanding that the staff draft of the WF2 is recommending that any redevelopment in the Executive Boulevard area be accompanied by a designated elementary school site. We believe there are other options besides Executive Boulevard better suited for an elementary school in the Walter Johnson Cluster involving the
reopening of closed school sites, or other developable sites. The staff draft references that a new elementary school could be provided by reopening a former elementary school in the WJ Cluster, such as Alta Vista, Aylawn, Kensington or Montrose Elementary Schools.

The Montgomery County Public School (MCPS) system is not currently requesting a new middle school site be designated in the WJ Cluster. We support the recommendation to carryout planned expansion projects for North Bethesda and Tilden Middle Schools. If it is not possible to address enrollment increases through expansions, it would be prudent to look at utilizing available capacity in middle schools surrounding the WJ Cluster, such as in the Winston Churchill Cluster where both Cabin John and Herbert Hoover Middle Schools are projected to have available space.

The Planning Board has a tremendous opportunity in the WF2 to address challenges Montgomery County has faced regarding older, suburban office parks by allotting us the necessary zoning, density, and height to move forward with crucial revitalization efforts. The Coalition is prepared to move forward with multiple uses for our properties and this is the one opportunity the County will have to achieve our shared vision of a unique, walkable mixed-use urban community on Executive Boulevard.

We appreciate your consideration of our request and look forward to hearing from you.

Sincerely,

Mr. Chairman and Commission Members, thank you for the opportunity to bring to your attention the views of the owners of condominium townhouses and apartments in Cherington. The Cherington Homeowners Association represents owners and residents of Cherington, a community bounded by Montrose Road, Montrose Parkway, and East Jefferson Street and Stonehenge Place. Our community is in the Rockville Pike — Montrose North Planning Area and many of the proposals for rezoning and street modifications provided for in the staff draft plan for the White Flint 2 sector (Staff Draft) would directly impact us. I want to thank the staff, which has been very helpful to us in explaining the proposal and listening to our concerns.

Background

Just to the south of and backing onto townhouses in our community is undeveloped land with trees. These trees provide a buffer that separates our community from Montrose Parkway and some of the noise that commuters generate on the Parkway. To the east of our community is an existing entrance to the community constructed by the Department of Transportation within the last eighteen months. We negotiated extensively with the Department over this entrance to ensure that driving on a steeply graded road with a sharp curve would be safe and to eliminate any cut-through traffic onto our private streets on which neighborhood children play. To the east of our community is the Executive Sunoco Gas Station and undeveloped land.

The Draft Plan would make changes to each of these areas. Our comments address each area separately.

1) Forested Land South of Cherington

The existing zoning for this area (R-200) would allow for construction of a few houses on this property. The Staff Draft would leave this zoning in place with two changes.

First, the Staff Draft proposes to have most of the forested area to our south dedicated to the Parks Department to retain as a forest and to develop a linear park along Montrose Parkway. The Staff Draft would leave most of the existing tree buffer in place enhanced by new planning and create a linear park along the Montrose Parkway in the excess right of way adjacent to the Montrose Parkway Bikeway and open the area for further appropriate park development. We support this proposal for the reasons we discuss below and we look forward to working with MNCPPC staff on appropriate uses of this area.

There is, however, a separate piece of property that includes Stonehenge Place up to our property line and the areas immediately adjacent to its east and west that the Staff Draft proposes to zone for commercial/residential development. We understand from County staff that zoning is made along property lines so the property needs to have one type of zoning. Since the staff wants to allow for commercial/residential development in the area to the east of Stonehenge Place it has proposed the zoning for that purpose. Unfortunately, that would allow for development of a small piece of property (33,705 square feet) behind the first set of homes along Stonehenge Place as you enter the community from the new entrance. Such development
would undercut the very benefits that the County would obtain by using the adjacent area for open and park space.

Because this area is contiguous with the proposed park space, it would be better suited for the park and would serve to enhance the public space. Cerhington urges the MNCPPC to support dedication of the entire area to the immediate south of our neighborhood to the Parks Department and to transfer to the property owner developments rights that the owner could use either in the area to the east of Stonehenge Place or to another property in the planning area.

The preservation and dedication of all of this land to the Parks Department is consistent with a number of County goals as identified in the Staff Draft including:

* Implementing the County open space requirement goal for new parks and urban spaces to promote a livable environment for area residents (pages 18, 21 and 31);

* Linking the proposed linear park and forested open space with the existing Montrose Parkway bikeway (pages 18, 52 and 76);

* Furthering County sustainability goals by retaining the existing wooded areas, mitigating carbon emissions and providing an increased tree canopy throughout the Plan area (pages 21, 31, 55 and 58);

* Creating an attractive public space (page 18). The forested sections of the Parkway enhance the appearance of this developed area and provide and preserve an aesthetically appealing buffer zone; and

* Continuing compatibility with the existing Cherington neighborhood and providing area residents with passive recreation adjacent to an existing community (pages 7, 20, 21 and 31).

Although not mentioned specifically in the plan there is growing evidence of the benefits to health from spending time in nature. Information developed by the American Society of Landscape Architects summarizes this evidence. https://www.asla.org/healthbenefitsofnature.aspx.

Finally, development in the forested property to the south of Cherington would change the fundamental nature of our quiet community and its forested buffer to the world. And the proposed zoning for the piece of property adjacent to Stonehenge Place would authorize construction of parking lots with extensive lighting and commercial development that would negatively affect not only the townhouse residents living near that part of the property but the Cherington community’s property as a whole. Cerhington is also concerned that if the forested area to our south was developed, it would create a negative traffic pattern at one of our two entrances/exits.

Cherington opposes the Staff Draft’s proposal to allow for commercial development in the eastern part of the existing forested area to the west of Stonehenge Place.

2) Land East of Our Community

The preliminary plan would allow for more extensive mixed use development in the area to the east of our community with possible construction of a school. We do not object to the proposed zoning change that would allow for mixed residential and retail use and would be consistent with the ongoing Pike and Rose development. We also support the plan’s requirement to reduce building heights as you move from east to west toward the Cherington townhouses to establish what the Staff Draft calls “a compatible relationship with the existing residential development.
3) New North-South Street

The Staff Draft would change the existing Stonehenge Place entrance constructed just last year by the Department of Transportation to go through the gas station to the planned Hubbard Street extension. We are concerned that if not constructed early in the development process and if not properly marked Cherington may see an increase in cut-through traffic in our community. Our community owns and maintains its streets and often has children playing in them. Any proposal must ensure that there will be no cut-through traffic in our community from any development on land to the east of Stonehenge Place even on a temporary basis until the new road is completed. Any development should provide that there are adequate alternative entrances and exits to and from the developed property to ensure that this new road does not have more traffic than it can handle making it more difficult for us to enter and leave our community and possibly resulting in more cut-through traffic. Even if our concerns can be addressed, we believe there should a light at Stonehenge Place and Montrose Parkway to allow pedestrians safe and controlled passage and to reduce speeds on Montrose Parkway.

4) Removal of One Lane of Traffic on East Jefferson Street for a Bike Lane:

The Staff Draft proposes to create a bike lane on East Jefferson Street from Montrose Road to Rollins Ave similar to the one now found on Nebel Street. We believe that this will increase congestion on East Jefferson Street and make travel much more difficult. We already see a backup of traffic on East Jefferson Street south on Montrose Road to Montrose Parkway where because of turn lanes there only is one through lane.

Conclusion

We want to thank the MNCPPC for the opportunity to provide comments and we want to thank the MNCPPC staff for meeting with us several times to discuss the impact of the proposal.

The Cherington Community looks forward to working with the MNCPPC and its staff in the further development of the Staff Draft.

Cherington Petition/Owners

Owners Who Responded to Sign the Petition Via Email:

December 22, 2016:
1) Please add me to the petition.
   Kimani Clark – 6018 Stonehenge Place
   My new email address is kimaniclark@outlook.com.
   Thanks.

2) Hello Ros. Sure! Just go ahead and sign for me. Thank you for taking care of this.
   Denis Belik - Dec 22, 2016 6:31 PM, Denis Belik: , 6149 Stonehenge Place

3) December 24, 2016 Thank you for your email. Yes, please add Niloo Far Rezvani and
   Amir Eshaghi to the petition as owner of a house in the community; 6147 Stonehenge
   Pl, Rockville, MD 21152.
   Here I want to say thank you and Ric Erdheim for all you do.
   Thank you for your time and happy new year,
   Best,
   Niloo Far, Amir

4) December 26, 2016
   Dear Roz,
   Thank you for the e-mail to Angie.
   Please add our names to the petition. Thank you for being so vigilante for the welfare of the
   community. Our best wishes to you and your family for the new year.
   Regards, Julio and Angie Jimenez

5) Dear Mark and Ric -- This is Victor Galitski of 6026 Stonehenge. First, thanks for your
   message and your efforts. I have not been aware of the plans to wreck our community. Now, I
   am greatly worried. Please, let me know how I can help?

6) Avihu Hiram <hiram7@bezeqint.net> 11904 Castlegate
   Date: Wed, Dec 21, 2016 at 4:29 AM
   Dear Mark – Thank you for updating us on these important issues. As we are, currently, away –
   we cannot physically sign the petition (I saw no remote signing option). Please add our signature
   to the petition or, if there is a way to sign this petition, please instruct us. Thank you again for the
   important work you are doing. Regards

7) From: Hammad Qureshi <hammadq80@gmail.com> - 11909 Kingsbridge Way
   Date: Tue, Dec 20, 2016 at 8:54 PM
   Thanks, Mark Go glad to hear that the plan has been revised. I will be out on vacation starting
tomorrow for 8-9 days. Is there a way o could sign the petition via email? Thanks

8) Lantigua-Williams Family <ayojuleyka@gmail.com>
Date: Tue, Dec 20, 2016 at 3:34 PM
Cc: Ayotunde Williams <a.williams@siralusa.com>
Hello Mark, Thank you for bringing us up to speed on this, which we were not aware of. We'll be happy to sign the letter. Thank you for representing our community at the meetings. Talk to you soon. Juleyka
202-330-1759

9) Nadya Elis <nadyaelis@yahoo.com> 11910 Castlegate
Date: Tue, Dec 27, 2016 at 7:49 PM
Subject: Re: Cherington possible parking violation
Hello Mark, I would like to have the petition to sign. Thank you, Nadya Elis

10) We will be out for dinner but you have our authority to add both of our names.
Ric Erdheim
11901 Grey Hollow

11) January 5, 2017
I support the petition to keep the trees.
Thanks,
Jason Liverette
11902 Castlegate Ct.

12) Hello Roslyn, January 5, 2017 I support the petition. Please add my name to the list. Dana Klein
11906 Castlegate Ct

13) Hello Roslyn,
I support the petition. Please add my name to the list.
Thank you
Christina Widodo, 11901 Bristol Manor CT

14) Yes, you can add my name to the list:
Amy Fried
Thanks, Amy
Amy Fried – 6002 Stonehenge Place

15) Hi Ros, January 6, 2017
Please add my husband and my names to the petition:
Raul & Elena Garcia
6010 Stonehenge Place
Thank you so much! Elena
16) Hi Roslyn, - January 6, 2017
My name is Jimmy Su, and I'm the owner of 11905 Castlegate Ct (Cherington). I received an email from Mark Loveland asking to email you in order to add my name to the petition in support of preserving the forested area to the south of our community.

17) Add Stanton Joseph and Susan Joseph to the petition. January 6, 2017
Thank you, 11911 Kings Bridge
Stan Joseph

18) Galia Ron – January 3, 2017
Hi ros
Sorry I didn't see that the mail but anyway
Yes please sign me and rafi on the petition
G

19) Mary Palmer – January 5, 2017
Hi Ros,
I support the petition. Please put my name on the list!
Thank you so much.
Mary Palmer

20) Steve Loewy, 6000 Stonehenge Place
Yes, of course. I am close to the planning board, as you know.

Sent from my iPhone

21) Janu 6, 2017
I would like to sign the petition.
Thank you,
Inessa Shusterman
6133 Stonehenge Place

22) January 6, 2017 Hello Roslyn, I support the petition.
Please add my name to the list. Thank you, Leopold Sedogo, 11901 Castlegate Ct

23) January 6, 2017
Please add my name to the petition to the MNCPPC in support of preserving the forested area to the south of the Cherington community. I am Ngoc Tran, owner of 6134 Stonehenge Place.
Thank you, and thank you for all your work for the community. Ngoc Tran
24) January 8, 2017
Roslyn, Please add me to the petition.
Thanks,
Vincent Ho
11908 Castlegate Ct

25) January 7, 2017
I support the petition, and please add my name to the list.

from existing homes located south of the property.

An existing 120-foot-high office building will be retained and hide the view of new buildings.

A 180-foot-wide forest area will be retained between development and existing homes.

New construction will be set back from existing homes a minimum of 570 feet.

Green space will be increased.

Force in Montgomery County, The additional building height will accomplish the following:

Additional building height within the recommended 2.0 FAR is needed to allow the construction of the most up-to-date buildings that serve the demands of the knowledge-based work environment. The ability to serve the needs of our existing and future office and residential tenants.

Additional building height within the recommended 2.0 FAR is needed to allow the construction of the most up-to-date buildings that serve the demands of the knowledge-based work environment. The ability to serve the needs of our existing and future office and residential tenants.

We support the staff recommendations for the mix of land uses, the density, and the use of the site proposed in the Public Hearing Draft.

Our recommendation is to allow buildings to be 150 feet high with a step-down along the south property line (6' CTR 2.0, C; 7.0, R 1.5) instead of the building height of 120 feet. Our recommendation is to allow buildings to be 150 feet high with a step-down along the south property line (6' CTR 2.0, C; 7.0, R 1.5) instead of the building height of 120 feet.

The purpose of this letter is to provide testimony on the recommendations in the Public Hearing Draft of the White Flint Z Sector Plan for our property located at 6030 Executive Boulevard.

The Honorable Casey Anderson and
Property a mixed-use development opportunity: Some point in the future, it may be entirely appropriate to afford the
zoning zone for the property that could be achieved at a later time. Thus,
where the Board to include in the plan a recommendation for a CR
industrial zone on the property instead of a CR D designation, we would
recommend that the Board decide to retain

3. Planning Zone Designation

This is the most appropriate alternative. The technical staff on this zone amendment to the Board believes
should be expanded. We would welcome the opportunity to work with
commercial uses permitted in the industrial zone to determine if they
can co-exist. As part of the ZTA, it would be useful to evaluate the
property, but recognizing that industrial and residential uses can
serve the very useful function of supporting the industrial zone on
50% of the mapped density to be developed as residential. This would
mature the property to the IM at a 2:0 with a height of 75 feet (17.5
foot building) with a height of 17.5 feet (5.25 story), the IM.

Thus, what we are recommending under this alternative would be to
expand the commercial uses that are desired by residents and
workers, and create a Great Live/Work Community. However, there is no reason why the two uses, together with an
Industrially zoned property that has not utilized the useful life
development. We understand that the County is reluctant to eliminate
location is one that is able to support vibrant, quality residential
overly similar to the Twinbrook Overlay Zone. The property's
Board concludes that industrial zone should remain. The Board

Thanks. For forwarding to Nancy and Nkoko

Yearwood, Nkosi
The Property is currently developed as an approximate floor area ratio of 0.8. The requested zoning would allow approximately 95,000 SF of new development on the Property.

Currently zoned CR-2.5, C-0.25, R-0.72, H-5.75, the Plan proposes CR-1.5, C-0.25, R-0.4. The property is currently zoned CR-1.5, C-0.25, R-0.4. This plan would reduce density and height of the property to CR-1.5, C-0.25, R-0.4, which is considered to be more consistent with the surrounding neighborhood.

Specifically, the proposed White Pine 2 Sector Plan for the property includes the following:

- Additional density and height is appropriate in context of the zoning recommendations in the neighborhood and within the physical constraints of the property.
- The plan would allow for the possible future development of the property with a limited amount of additional residential and commercial uses.
- The plan is consistent with the Planning Board's recommendations for the area.
- The plan is consistent with the recommendations of the Planning Board.
- The plan is consistent with the recommendations of the Planning Board.

The November 2016 Silver Spring Regional Plan for the White Pine 2 Sector Plan (the "Silver Plan") includes the "Silver Plan." The Silver Plan is consistent with the recommendations of the Planning Board.

Dear Chairman Anderson and Members of the Planning Board:

Re: White Pine 2 Sector Plan Silver Spring - The Montgomery County Planning Commission

On behalf of the Montgomery County Planning Commission, I have the honor of submitting the White Pine 2 Sector Plan for your consideration.

A recommendation to rezone Willow Grove to CR-1.25, C-0.2, R-1.25, H-1.2 would also enable us to help address several other problems facing our community. Namely, as part of a comprehensive and thoughtful multi-family development plan, we could continue to build on the concepts of walkability, connectivity, and livability that have defined our community for decades. This would not only enhance our neighborhood, but also contribute to the larger goals of smart growth and sustainable development.

In particular, Willow Grove faces challenges related to aging buildings and infrastructure. As we focus on preserving historic landmarks and enhancing the quality of life for our residents, it is important to consider how these older structures can be adapted for modern needs without compromising their unique character.通过 incorporation of green building practices and energy-efficient upgrades, we can ensure that these buildings remain functional and attractive for future generations.

In the coming years, we will see significant growth in our community. As we prepare to welcome new neighbors, it is crucial to develop a comprehensive plan that addresses the needs of the current residents while also accommodating future development. This includes considering the potential for additional housing developments, as well as thoughtful preservation of existing properties.

We understand the primary objective of the plan is to retain market-rate housing that is affordable and attractive to a diverse range of individuals. As we evaluate potential development projects, we will continue to prioritize the needs of our residents and ensure that any new structures complement the existing character of Willow Grove.

We look forward to working with the Montgomery County Planning Board to ensure that the Willow Grove Overlay Area Plan is developed in a way that respects our history and values. Together, let us create a community that thrives for years to come.
Thank you for your consideration of this matter. If you have any questions, please do not hesitate to contact me.

Community members recognize multiple challenges that all involve significant expenses.

A recommendation of a residential tower with commercial uses above is required in order to maintain the existing Fiscal Court approval process. Recognizing that this would enable increased development to occur, a rezoning request of the White Pine 1, 2, 3, and 4, both north and the rezoned zoning of the White Pine Road to CR-1/2/3/0/23/2/12, is also recommended. The rezoned zoning of White Pine Road to CR-1/2/3/0/23/2/12, currently on the White Pine Road, is also recommended to allow future development.

A recommendation for a commercial tower is required in order to maintain the existing Fiscal Court approval process. We may also be able to assist in reduced costs of implementing such additional vertical access. We may also be able to assist in reduced costs of implementing such additional vertical access.

As a matter of fact, the vehicular access concerns discussed above, we also request

</table>

The proposed flood section should identify the widths of the existing median and lane panels.

Where we support the intent to add separated bike lanes, note the new accessibility requirements.

When we support the intent to add separated bike lanes, note the new accessibility requirements.
| General | A8 | 79 MCDOOT | DO | 60 |
|---------|----|------------|----|----|---|

- 777 - Red/Blight Path at end of Gauna Rd
- 777 - Executive Blvd Widening
- 777 - E Jefferson St Road Diet
- 669 - Implement a White Filter Circulator SHUTTLE
- 666 - Convert MD 355, Clarksburg Rd, and North Bethesda Transitway BRT Lanes
- 668 - Second Street Station
- 668 - Secord Station
- 666 - Bloomingdale
- 666 - Bloomingdale
- 666 - Bloomingdale
- 666 - BFFA Funding
- 665 - New Bladwin Connector (unnumbered each lane)
- 660 - Convert Clarksburg Ave (b-q) from private to public and associated reconstruction as needed
- 650 - Improve vehicle, bicycle, and pedestrian connections (any specific instances)
- 650 - Extend Rose Ave to b-3
- 650 - Redesign Jefferson St as b-5 for a portion not already under this designation
- 650 - Redesign A-27 to b-6 and associated reconstruction
- 650 - Construct b-2
- 650 - Extend Hubbard Dr westward from MD 355 as b-1

As was done with Bethesda, we note that a listing of CIP Projects be provided. More with Identifiable Lead
