

pedestrians.

One drawback of living here is being downwind of the pollution of traffic from Rte 29.

What do you think will happen if thirty townhouses are built across the street from Aspen Forest II?

That's at least 30, if not 50 or 60 cars going up and down Dogwood Dr. daily, in addition to those from our complex and the apartments adjacent.

That will be more trees chopped down, in addition to those mown down ~~by~~^{by} a project east of Dogwood Dr. Add to that the fact that we are faced with the distinct possibility of the ICC being built to intersect with Briggs Chancy about 100 yds. east of Dogwood Dr. It adds up to increased traffic on Briggs Chancy Rd., more pollution, and far fewer trees to deal with that pollution. It will mean closed

windows in good weather. It will render Dogwood Dr. unfit not only for pedestrians but also for the wildlife that inhabits it.

And at the worst, this is yet another case in Montgomery County of developers developing, grabbing their money, and running, leaving hapless new homeowners, as well as previous homeowners, in gridlock, pollution, and overcrowding.

These are my comments - please don't build.

Sincerely,

C. Longo
